

Have Your Cardiovascular Risk Assessment Glasgow Done At Quantum Health

Cardiovascular Risk Assessment Glasgow

Edmonton, London Jul 13, 2022 ([Issuewire.com](https://www.issuewire.com)) - We at Quantum Health are a private general practitioner (GP) clinic with our headquarters in the middle of Glasgow that was established in the year 2020 by Dr. Kashif Ali and Dr. Usman Haq. We prioritize the needs of our patients in everything that we do. A range of services that are convenient, adaptable, and affordable is provided to our patients by our innovative approach to general practitioner-based care. We make it a point to pay attention and

collaborate with you to identify the approach to health and wellness that will be most beneficial to you. Our [cardiovascular risk assessment Glasgow](#) is best for people concerned about their heart health.

We give face-to-face and web consultations at a location and time that is convenient for you, covering a wide range of topics, from male health to issues related to menopause, anxiety, and burnout management to weight loss management. Regardless of when or where you prefer, you can count on getting an appointment with an experienced physician at Quantum Health. If you and our team work together, you can rest assured that your well-being and health will always be our primary concern.

It is estimated that one adult in every three in the UK suffers from high blood pressure, also known as hypertension. In the absence of treatment, it can result in cardiovascular issues, strokes, and another potentially life-threatening injury to your major organs. Your consciousness of the dangers can be raised with our assistance, and you can take steps to protect your health to lower those risks. You can sign up for a [private GP appointment online](#) and get your heart health checked instantly.

It is no secret that everyone goes through periods of stress, especially during times like these when things are particularly unusual. Are you aware, however, that some stress, particularly low-level stress, can be good and even beneficial and inspirational? We will walk you through some straightforward actions that you can take to better manage your stress levels, actions that will be beneficial even in the most trying of circumstances. By booking an appointment with our psychiatrist consultant, you can take a step forward toward reducing your stress levels.

We at Quantum Health provide several different STI tests and screenings that are planned by keeping people's sexual health into consideration. Assessments for sexually transmitted diseases, such as Hepatitis c, Chlamydia, Syphilis, HIV, Hepatitis C, Gonorrhoea, and Genital warts, can be performed with ease, and the results can be obtained quickly.

Quantum Health, which has a successful track record in both weight loss and weight management, provides patients with scientifically validated, non-invasive therapies that easily and quickly help lower inches and eliminate obstinate body fat. These treatments are effective. In addition to personal trainers, nutritionists, and psychologists, our holistic approach also incorporates cutting-edge laser therapies such as Saxenda and Verju.

Verju is a painless, non-invasive green laser treatment that does not require any downtime, does not cause any side effects, and does not cause any pain. The Food and Drug Administration has given its stamp of approval for its use in cellulite treatment and fat reduction. We utilize it to trigger fat burning at Quantum Health, and our goal is to ensure that you can keep the weight off by providing you with the necessary lifestyle advice.

When combined with a meal plan that is low in calories and increased physical activity, the prescription injectable medication Saxenda may help certain adults with excessive fat who are also diagnosed with medical issues (like type 2 diabetes, high cholesterol, high blood pressure or obesity) to lose fat and stay off it.

Our convenient travel clinic is here to assist you in traveling securely and with the necessary immunizations, no matter where or when you plan to go on your trip. Everything you could need, from cordial advice and suggestions to walk-in appointments the very same day and blood tests, is available here. Our GP clinic is the best when it comes to [travel vaccinations Glasgow](#).
