Chris says this of this EP "Two-Faced Death Dealer"

"Dragon and Berr (Edwin and Donna Millheim) wrote the lyrics and recorded the music. Edwin gave me the lyrics in sections along with directions on the type of delivery they're looking for as well as samples of the music for reference. With them, I've been able to experiment with different styles of music and vocals. I definitely expand my abilities and leave my comfort zone.

We've worked on a few songs before, and they turned out really well. Their (Dragon and Berr) production style is very bombastic! I found this out when we both did mixes for my EP Hate Manifesto, and I had to release both versions. They produce in such a way that it breathes new life into the songs!"

"Two-Faced Death Dealer" by I Misanthrope and featuring Dragon and Berr is out on July 9th in over 600 digital retail outlets. Mix a little surprise punch in your metal and pick up a copy of "Two-Faced Death Dealer"
