

## **Kristen Case, MD, a Child & Adolescent Psychiatrist with PrairieCare**

Get to know Child & Adolescent Psychiatrist Dr. Kristen Case, who serves patients in Edina, Minnesota.

**New York City, New York Jul 28, 2022 ([Issuewire.com](https://www.Issuewire.com))** - A devoted child & adolescent psychiatrist,

Dr. Case has been affiliated with PrairieCare since 2009. She enjoys her role in PrairieCare's partial hospital program since it allows enough time to really get to know her patients and their families well, while providing comprehensive psychiatric care with her treatment team. She believes that the partial hospital setting enables her to care for the whole family system including the identified patient. She also enjoys working with other physicians in a collaborative care model, and acting as a mentor to others committed to the mental health care of children and adolescents.

PrairieCare offers mental health services to youth, adolescents, and adults at ten locations throughout Minnesota. Their services span the full continuum of care for patients. Its mission is to provide each individual patient with the psychiatric care they truly need.

With a long-standing passion for working with children, Dr. Case completed her undergraduate training at Carleton College, and earned her medical degree at the University of Minnesota in 2004. She then went on to complete her residency in psychiatry and her fellowship in child & adolescent psychiatry at the same educational venue in 2008 and 2009, respectively.

Following her training, the doctor attained board certification in psychiatry through the American Board of Psychiatry and Neurology (ABPN). The ABPN is a not-for-profit corporation dedicated to serving the professions of psychiatry and neurology.

In order to remain up to date in her field, she is an active member of the American Psychiatric Association, the American Academy of Child and Adolescent Psychiatry, the Association of Women Psychiatrists, the American Medical Association, and the Minnesota Medical Association.

Because of her love of teaching, Dr. Case is also an adjunct faculty member at the University of Minnesota, teaching medical students, residents, and child/adolescent psychiatry fellows.

Psychiatry is the medical specialty devoted to the diagnosis, prevention, and treatment of mental disorders. These include various maladaptations related to mood, behavior, cognition, and perceptions. Psychiatrists evaluate, diagnose, and treat patients with mental, emotional, and behavioral disorders. They conduct thorough psychiatric evaluations, develop treatment plans, prescribe medication, and evaluate treatment results.

In her free time, Dr. Case enjoys outdoor activities and spending time with her family and dogs.
