

Manufactures and Provides Core Hole Drills, Bevel Milling Machines, Chamfering Machines, and Many Others

Land Mecklenburg-Vorpommern, Germany Jul 4, 2022 ([Issuewire.com](https://www.issuewire.com)) - BDS Maschinen GmbH is one of the best companies that manufactures magnetic core drills, core drills made from high-quality steel grades, bevel milling machines for edge preparation, as well as chamfering and deburring machines for the metalworking industry. They concentrate on the most important functions that a product should accomplish and develop simple and practice-oriented solutions. They provide a wide range of products including magnetic core drills, core drill box & cassette, edge milling machines, and accessories like magnetic drill stand, tool holders, adapter with Weldon shank, transport case, and many others. To know more about BDS Maschinen GmbH and its exclusive range of products, please visit: <https://www.bds-maschinen-gmbh.de/>

A core drill is a hollow, cylindrical drill that is used to make holes through a surface. A [Kernlochbohrer](#) (core hole drill) is usually made of metal, and the drill tips are generally covered with either diamond or carbide. It is composed of a motor, handle, and drill bits. The main alteration between a core drill and

other cement cutting apparatuses is that a core drill will excerpt a sample from the material. The centre of the drill is hollow, permitting it to carve out a sample from the drilled material. The size, power, and features of a core drill can differ, depending on what it will be used for.

BDS Maschinen GmbH is one of the reliable companies that manufacture high-quality core drills. Their core drills are produced in modern CNC-controlled grinding centres. This guarantees consistent grinding, quality, and cutting performance of all the firm's drilling tools in the entire range. Their core drills are manufactured in five cutting depths of 30, 35, 55, 75, and 110 mm and with over 94 different drill diameters. They offer their core drill with different tool holders that fit the KEYLESS quick-change drilling system as well as the MT 2, MT 3, and MT 4 industrial holders with automatic or manual internal lubrication, which are also available in the range of accessories.

BDS Maschinen GmbH is known as one of the top manufacturers of core drills and magnetic core drilling machines. Since the entity was founded in 1989, they have been manufacturing magnetic core drills, core drills, bevel milling machines, as well as chamfering and deburring machines for the metalworking industry. Their customers from industry and trade as well as specialist dealers are competently looked after and supplied by them on the basis of fair and partnership-based cooperation. They develop tailor-made special machines for their customers in small series or even as a one-off. They provide people with important information about core drilling and their product innovations.

About BDS Maschinen GmbH:

BDS Maschinen GmbH is known as a prominent core drill and magnetic core drilling machine manufacturer. The firm manufactures and provides a comprehensive range of products including [Kernlochbohrer](#) (core hole drill), edge milling machines, and several other accessories at reasonable prices.
