

New Laravel 9 Series Launched To Create Multi-Vendor E-commerce Website

Stack Developers Youtube Channel is going to create a Multivendor website that can handle both B2B and B2C.

Ludhiana, Punjab Jul 10, 2022 (Issuewire.com) - Stack Developers Youtube Channel is pleased to announce the launch of their newest Laravel 9 series at Youtube.com/StackDevelopers. The sole purpose of the series is to create a Multi-Vendor full-featured e-commerce website in [Laravel 9](https://Laravel.9).

Laravel is one of the most popular PHP frameworks for developing websites. And, recently, the Laravel 9 version was released, which Stack Developers use to build Multi-Vendor/Seller e-commerce websites.

A multi-vendor portal or website is a platform for third-party sellers to sell in one place. E-commerce websites are good examples of multivendor websites, where multiple vendors are allowed to register on a single platform with the same shopping cart and sell their products.

Stack Developers Youtube Channel is going to create such a kind of multivendor website that can handle both B2B and B2C.

To create a Laravel 9 Multi-Vendor E-commerce Website, the series follows the steps outlined below:

- 1) Vendors register on the website, either for a fee or for free.
- 2) Once the vendor has registered and uploaded his products, customers can begin purchasing from him.
- 3) The owner of the multi-vendor website may charge a small fee to each vendor for each transaction.

- 4) Most of the payments are transferred to the website owner, and from there to the vendor chosen.
- 5) Product delivery is handled by the vendor or even the administrator.
- 6) Communication about faulty products can be conveyed to the vendor or even the store admin, which the seller handles.

The Stack Developers Youtube Channel is for every student/developer to learn the Laravel PHP Framework from basic to expert level. They have launched the Laravel 9 series on the heels of their success with the Laravel 8 series.

For more information about this new series, interested parties are encouraged to visit https://www.youtube.com/watch?v=T0Xm6Xm_Dvw
