

QuickFuneral LLC Launches Funeral Program Template

Alabaster, Alabama Jul 18, 2022 ([Issuewire.com](https://www.issuewire.com)) - QuickFuneral LLC announced today the launch of its [Funeral Program Template](#), a service that provides customers with an easy option to create, design, and print funeral programs, obituary programs, and more. These programs are an essential piece to the funeral service because they provide a tangible piece of history and memorial of the loved one even long after the funeral service has ended. They also serve as a way to help guide attendees along in the funeral order of service.

The service will be available online on July 22 to customers everywhere. Customers can create funeral programs using Microsoft Word or any other common application they are comfortable using.

“Our valued users can now easily download funeral templates from our website, which are pre-designed for online editing and are easily printable,” said Nitin Chaudhary, Product Manager of QuickFuneral. Chaudhary added, “There is absolutely no need to install any software on your computer and everything will be done online through our simple and user-friendly interface. Memorializing the passing of a loved one is an emotional event and planning for it should neither be time-consuming nor difficult.”
