

REX Coin has Listed on the NexDAX Exchange

REX NFT is a renewable energy credit NFT and cryptocurrency project on Polygon and BSC. Their NFTs are real renewable energy credits and represent 1,000 kWh of renewable energy.

Washington, D.C, District of Columbia Jul 25, 2022 ([Issuewire.com](https://www.issuewire.com)) - REX NFT's token, REX Coin, has been listed on the NexDAX exchange. The listing went live at 7 AM UTC on Friday, July 22. This listing is for REX Coin (BEP20) on the binance smart chain. REX Coin on Polygon will also be listing soon. We are very happy to partner with NexDAX. They have a great reputation for providing cutting-edge trading platforms and tools. We look forward to expanding our REX NFT userbase with this listing. This listing will also provide liquidity and more trading options for our existing userbase.

We will be listing on more exchanges over the next couple of months. At the time of this writing, we are working on launching our REX Coin liquidity pool on PancakeSwap.

Keep in mind, that we are a multi-blockchain token. Our REX Coin on Polygon will also be listing on NexDAX and on QuickSwap and Uniswap very soon. Our Polygon/BSC bridge is on our partner's website [Multichain.org](https://multichain.org)

REX NFT is a renewable energy credit NFT and cryptocurrency project on Polygon and BSC. Our NFTs are real renewable energy credits and represent 1,000 kWh of renewable energy. When you buy a REX NFT, you are directly funding renewable energy that will be used in our electric grid. We launched REX Coin so it can be used in our REX World Metaverse and in our dApp/tokenized REC Marketplace. Our mission is to tokenize renewable energy credits and create the first ever consumer market for tokenized renewable energy credits.
