"We are thrilled to welcome our new facility. We have been working on this for several years, and it will give us the best experience for customers, especially those who are not able to get custom interior kits from us. It will be an excellent move for us as we can now offer custom interior kits that are unavailable in the market. Custom interior kits are made of different materials and come with different colors and designs, which can be designed by the designer according to the customer's needs. These kits are customer oriented, where the customer gets everything according to their specifications. They can even be made out of any material, such as leather or vinyl. Custom interior kits are more costly than traditional interiors, but they look more elegant and classier than other types of interiors too. They look so good because they have fewer unwanted parts compared to regular interiors. This makes them easier to install in your car's interior too. We also have a wide variety of customization options, whether in the form of interior kits or complete customizations." said Moe Pilgrim, Owner of Rich's Custom Upholstery Inc.
