

## Rodan's Energent Microgrid Controller Earns Top Product of the Year Award from Environment + Energy Leader

Rodan controls the 'heart' of Canada's first carbon neutral school.

**Mississauga, Ontario Jul 20, 2022** ([Issuewire.com](https://www.issuewire.com)) - Rodan Energy Solutions, a leading North American provider of energy solutions, today announced that its Energent SCADA-as-a-Service (SCaaS) received a Top Product of the Year award at the annual Environment + Energy Leader Solution Summit. The program's expert judges considered the Energent SCaaS to be an impressive example of the exemplary work being done today in the fields of energy and environmental

management.

Rodan's Energent Renewable + Energy Storage suite includes solutions to manage and monetize DERs, from microgrid controllers and energy optimizers to full DER turnkey solutions. By helping customers get the most out of their grid-connected assets, Rodan is delivering on its company mantra of making sustainable, and attainable.

The award-winning application was Rodan's contribution to Canada's first carbon-neutral school project. Working alongside cleantech integrator Ameresco, Rodan's Energent solution serves as a key enabling technology for the John Paul II Secondary School microgrid project to maximize the school's economic potential through continuous and real-time optimization of the solar panels and battery energy storage system.

One judge said of Rodan's Energent solution: "This is a complete package that integrates the best efficiency measures for a facility with the generation, storage, and grid interactions that all facilities will need in the future."

Another added, "The application of such a solution will reduce GHG emissions, decrease energy costs and help operators make informed decisions."

The Environment + Energy Leader Awards is a program recognizing excellence in products and services that provide companies with energy and environmental benefits, and in projects implemented by companies that improved environmental or energy management and increased the bottom line.

"With a very experienced and critical judging panel and a strict set of judging criteria, entrants faced an extremely high bar to qualify for an award in 2022," says Sarah Roberts, Environment+Energy Leader publisher.

### **About Rodan Energy Solutions**

*Rodan Energy is a leading North American provider of DER asset optimization, demand response, and energy intelligence solutions. Our mantra is making sustainability attainable for commercial and industrial energy users as well as power distribution and generation companies.*

*US operations are managed from Princeton, New Jersey with Canadian operations managed in Mississauga, Ontario, and Calgary, Alberta. Rodan is active across North America and offers services to customers in all deregulated markets including IESO, PJM, NYISO, MISO, NEISO, and AESO. [www.rodanenergy.com](http://www.rodanenergy.com)*

### **About the Environment + Energy Leader Awards**

*For the past decade, the Environment + Energy Leader Awards have celebrated excellence in the world of environmental, sustainability, and energy management. Award winners are truly buzz-worthy, and companies that sport a Top Project or Top Product of the Year Award badge are known to be the best of the best. When other companies are seeking a sustainability or energy management solution, they know that E+E Product of the Year Award winners offers a significant group of products, vetted by experts, to peruse for help in making their decisions. Project of the Year Award winners is known to illustrate how sustainability and energy management projects can successfully help other companies improve the bottom line.*
