

## **Save Earth Activist Sandeep Choudhary wins prestigious Leadership Excellent Award towards his Save Earth Mission**

Inflector India Co-founder Sandeep Choudhary has been honored by Leadership Excellent Award by Bollywood actress Ms. Dia Mirza

**Jaipur, Rajasthan Jul 20, 2022 ([IssueWire.com](https://www.issuewire.com))** - Sandeep Choudhary's firm makes inflectors that help to reduce carbon emissions.

Sandeep Choudhary, who has committed his life to find solutions to the challenge of global warming and protecting Mother Nature, has been honored with Leadership Excellent Award by Ms. Dia Mirza Bollywood actress for his tremendous work to save the earth from Global warming on 20th July 2022, Mumbai.

Save Earth Activist Sandeep Choudhary has been awarded many national and international awards, recently he was facilitated by the Icons & Trailblazers Award on 9th July 2022, New Delhi for his work on Carbon Emission Reduction

Sandeep Choudhary is from a middle-class family but his mission is not common, Co-founder of Inflector India is working on the mission to make the environment pollution free.

The inflector is a solar heat barrier designed by NASA, which was first used in 1960 in the spacesuits of astronauts during the Apollo mission. The inflectors' commercial use started in the 1990s. Inflectors are in use in more than 60 countries today.

"Research has shown that 75% of the solar heat comes through the window. The inflector is installed at the window and it reduces the heat coming through it by 70-80% and thus it reduces the carbon footprints. During winter the inflector can be reversed and it helps in keeping the indoors warm by absorbing sunlight. Again, energy use can be curbed, which means lower carbon emissions," Sandeep Choudhary shared.

Inflectors made by Inflector India can be used for as long as 25 years. Sandeep Choudhary said that to encourage the wider adoption of inflectors in the country, they are making them available at a significantly lower cost than in other countries.

Sandeep Choudhary was also paid a courtesy visit to Rajasthan Governor Kalraj Mishra. During the meeting, Sandeep Choudhary informed the Governor about Inflector India and highlighted that the carbon generated in India is 45000 million tonnes every year so how it can be reduced and the earth can be saved from global warming, On this, the Governor praised and encouraged him.

"Global warming is a real threat to the planet and us, and all of us need to contribute in every small and big way to find a solution to the challenge," added Sandeep Choudhary.
