

StackBill - Cloud Management Portal Launches New Website

StackBill Cloud Management Portal built on top of Apache Cloudstack website is redesigned to improve User Experience, with extensive product information overview, marketplace, and free POC edition.

Coimbatore, Tamil Nadu Jul 4, 2022 (IssueWire.com) - StackBill.com by Assistanz Networks Pvt. Ltd. - A Pioneer Cloud Management billing Portal built on top of Apache CloudStack® is excited to announce the launch of its redesigned website StackBill.com, [<https://www.stackbill.com>]. Since StackBill's product launch, the entire team has focused on enhancing of product UI/UX of the [Cloud Management Portal built on top of Apache CloudStack](#) and extended support over CloudStack consulting with the product to the clients. To educate new users about StackBill and to offer more documentation for existing users, our team worked on launching a new version of the website. Enormous information and documentation of the product with case studies with improved user interface and user experience are the core features of the new website.

Video overview of the [CMP for Apache CloudStack](#), Market Place, Implementation case studies on Public Cloud and Private Cloud Management Portal, and enhanced support are additional features. Launch of FREE Cloud Management Billing Portal POC edition, Standard Edition, and Enterprise Edition help users to choose their own plan according to their requirements.

“We are very much excited about the new version of the StackBill website. Kai-zen is the focus on this new website version and our team is planning to add more information to help users to use and utilize the full product potential” said CTO, Mr. Amal Ranjith.

StackBill.com invites visitors to explore the new website. Must visit Case studies, Market Place, and Product features to know more about the Cloud Management Portal.

StackBill's vision is to become the No.1 Cloud Management Billing Portal built on top of Apache CloudStack® by 2025.

StackBill is a product developed by AssistanZ which has pioneered IT services in INDIA for 15+ years, consistently delivering business value on Cloud Implementations, Datacenter Support, Remote Infrastructure Management, Customized Software Development, and DevOps Automation IT with the latest technologies available.
