

Up to 50% OFF PhotoIns - The Last Glimpse of Deals to Cool Summer Holiday 2022

Summer holiday is coming to an end, but Leawo's promo is still on the swing. This summer holiday 2022, Leawo Software offers up to 50% off PhotoIns, free Tunes Cleaner, and other up to 91% discounts to every visitor.

Shenzhen, Guangdong Jul 26, 2022 ([IssueWire.com](https://www.issuewire.com)) - July is close to an end, and so is the summer vacation. After shelving plans for the past few years, maybe everyone has gone for a trip this summer. Because of pent-up demand, COVID-19 restrictions ending and the back of airlines' full timelines, summer 2022 will be the busiest travel season ever. While domestic travel is still likely to be the largest portion of this spending, international travel is rebounding. After travel is a period of mass production of photos. In order to meet the needs of people to process photos in batches, Leawo Software, a company specializing in multimedia solutions and data management software, especially launches its [2022 Summer Holiday Giveaway & Specials online promotion](#), offering up to 50% off PhotoIns. What's more, during this event – specifically, until July 31, 2022, people can get up to 91% discounts and free Tunes Cleaner for a limited time.

[Leawo PhotoIns](#), which currently includes 3 main modules – Photo Enhancer, Photo BG Remover, and Photo Enlarger, is able to automatically enhance photo quality by AI technology, remove and change photo background via a smart algorithm, as well as enlarge photos by up to 40X without quality loss. All operations can be processed in batch or individually, in either auto or manual modes. In this event, with a 50% discount, this intelligent photo editor only costs \$54.97, saving \$54.98. Alternatively, for those who only need one module, a 30% sitewide coupon is available for each of them. Below are the details of each module:

- [Photo Enhancer](#) – Powered by artificial intelligence technology, Leawo Photo Enhancer can batch improve photo quality in one click, without human operation. When used as a portrait

enhancer, it can retouch skin, remove freckles, enhance eyes, adjust lighting, and more; When used as a landscape enhancer, it can fix exposure, correct white balance, enhance the sky, optimize colors, perfect tints, remove haziness, boost saturation, sharp edges, fine-tune contrast, etc.; When used as a RAW enhancer, it can fix lens-related issues like distortion, chromatic aberration, and vignetting; When used as a JPG enhancer, it can reduce noise, fix blur, and sharpen details to make JPG images look better.

- [Photo BG Remover](#) – Thanks to the smart algorithm, Leawo Photo BG Remover provides a one-stop solution for batch background removal. After loading source photos, this program will automatically and intelligently analyze the clipping edges, enclose the region to cut out and remove photo background in batch, without quality and size sacrificed. Even the hair and fur can be cut out precisely. Plus, for more accurate background removal, the manual mode can satisfy the needs of most people. After isolating the foreground into a transparent background, users can easily apply the photo to any desired background or solid color. Also, various effects like fuzzy, coloring, shadow, etc. can be added to the photo's foreground and background.
- [Photo Enlarger](#) – Driven by advanced AI technology, Leawo Photo Enlarger can batch upscale photos by increasing image resolution rather than simply enlarging pixels, with color rendering improved, artifacts reduced, and detailed texture enhanced. Therefore, no matter whether images are upscale by 2x, 4x, 8x, or even 40x, the images will maintain clarity and sharpness. In addition to photo enlargement, it can also downscale images to 0.5x. Most importantly, it can remove noise and mist from photos to make upsized images look clearer and more natural, as well as optimize contrast, sharpness, and brightness to enhance the photo quality. All of them can be adjusted automatically and manually. With hardware acceleration, it can batch process 5x faster.
