

Video Encryption Software - iShieldProtect®

SPV launched their new product to the market name iShieldProtect®. The software was established to end the piracy of online course content by respected online education forums.

Bengaluru, Karnataka Jul 16, 2022 ([IssueWire.com](http://www.IssueWire.com)) - SPV launched their new product to the market name [iShieldProtect®](#). The software was established to end the piracy of online course content by respected online education forums.

iShieldProtect® is a video-encrypted software that protects the data of the institutes that provide courses online. The software offers complete protection from getting accessed by many hence a complete solution for all the online coaching industry to protect their content online and offline.

As we know that in today's digital world, security for the content available online is not sure, and some threat is always around. Hence, to consider this matter seriously, SPV launched its software to secure the online digital subject matter of coaching.

The software includes protection for video encryption, assessment papers encryption, pen drive encryption, sd card encryption, and live streaming encryption. The content is safe to distribute to many hands and preserves the company's revenue.

iShieldProtect® oversees all the digital protection required for a platform without complex procedures and muddles. To be specific about their features than the software possesses several safety attributes.

Find out the characteristics of iShieldProtect® below:

- Equips advanced and groundbreaking protection
- One solution for comprehensive problems
- Easily operated by players
- Effective for the Digital Education industry
- Encrypt all formats of subject content on various devices.

Let's thank our digital gurus who help us when we have no one to tell us something!

About SPV

SPV is a company that deals in course content encryption to secure the unwanted distribution of the content to many hands along with a user-friendly experience for online coaching as well for learners. However, we keep customer experience as our top priority.

SPV Tech always manages to drive fresh or suggestive modifications to the app that construct the app into a more profitable operational business model and improve the content accessible to its provider and users.
