

#WHITEFLAG is a line of protective clothing made for the everyday person

Faron Alex Paul was inspired by his work in anti knife crime when he created #WHITEFLAG the first affordable stab and slash resistant clothing made for everyday use.

Kensington, London Jul 13, 2022 ([IssueWire.com](https://www.IssueWire.com)) - [Faron Alex Paul](#) was inspired by his work in anti-knife crime when he created #WHITEFLAG the first affordable stab and slash-resistant clothing made for everyday use.

The #WHITEFLAG Hoodie is the first in the range to be released and will be followed by a puffer jacket later on in the winter.

#WHITEFLAG can be purchased online at

www.whiteflagclothing.co.uk and at our pop-up store at

[361, Portobello Road W10 5SA](#)

from the 31st of July to August 4th

we will be holding a launch party on the 30th of July

with a LIVE demo of the clothing and its stab and slash resistant capability

(this will be carried out in a safe and controlled environment by trained professionals)

An evening of refreshments music poetry and a chance to buy a #WHITEFLAG hoodie.

After Faron was stabbed 18 times on two separate occasions, and when he heard there were young people at a party with weapons that his sister was attending, he arrived and confiscated knives from some young people at a party ([link here](#))

After this Faron took it upon himself to start taking weapons off the streets of the UK and started up his charity [FAZAMNESTY](#) successfully taking around 800 weapons a year off the streets of the UK.

#WHITEFLAG is a natural progression for Faron and his values and adds another tool he can utilise to protect people in the UK.

#WHITEFLAG is truly unique in the body protection clothing market being the most affordable and designed with an aesthetic for everyday wear not just work.
