

YCCI Unveils Activities to Practice Phonics for Kids

Ahmedabad, Gujarat Jul 29, 2022 ([Issuewire.com](https://www.issuewire.com)) - Do you feel confident speaking in the language you know efficiently? I guess, yes. The same is with the kids.

In this digital-savvy era, the English language has become the order of the day, especially in communication. And speaking fluent English has become a basic part of routine communication as well as confidence. As a parent, you must think the same and take specific steps to help your kids learn the language. You can search '[Spoken English Classes near me](#)' and enroll your kids to master the English language.

However, you must know that the first step to mastering the English language is learning phonics. How will you teach phonics when your kids want to play all the time? Fret not! YOU Can Change Institute (YCCI) has unveiled effectively proven activities to practice phonics for kids.

"We understand that teaching kids phonics is not a piece of cake. However, the activities that we conduct at [phonics classes in Shyamal](#), Ahmedabad make it much easier for kids to remember them while playing (according to kids)," stated the spokesperson from YCCI.

Search letters

First, kids need to remember letters and spell them out correctly. You can pick a magazine, newspaper, or catalog. Next, pick letters one by one. For instance, the first letter is 'C.' Your kids may find different words from the magazine, like cake, cooking, cat, etc. You can mark these words in the magazine and revise them later.

"Search letter activity is one of the important tasks kids must do. They learn new letters and their pronunciation. Learning new words along with letters is an added benefit," explained the spokesperson from YCCI.

Letter on cups

Not that your kids know many words, but thanks to the search letter activity, you can start asking them to make words. You can take 2-3 cups. Write 3-4 letters on each cup. You may write consonants on 2 cups and vowels on the last one. Lastly, ask your kids to make words out of those letters. You must roll over the cups once in a while.

"Phonics is a part of our spoken English classes in Satellite, Ahmedabad. Once kids learn phonics by heart, they can master the English language and speak it fluently, without any kind of hesitation," explained the spokesperson from YCCI.

Walk on words

This activity can make your kids learn new words with phonics and have some physical movements. You need to write some words with chalk on the playground floor. Next, you can ask kids to jump on the word spelled by you. This way, they will learn, and you can test whether they can remember or you need to explain phonics again.

These fun learning activities are proven at YCCI. Hence, they suggest playing these with kids and having fun.
