

911 Proxies Are Down, Where Are The Best Alternatives

Los Angeles, California Aug 9, 2022 ([Issuewire.com](https://www.issuewire.com)) - 911 proxy service (911.re), regarded as one of the few original residential proxy networks, has announced shutting down its operations after suffering a data breach.

Incident Details

Earlier in July 2022, Brian Krebs from KrebsOnSecurity had criticized the connections 911.re proxy service had dubious pay-per-install affiliate programs, which bundled its software with pirated software and free utilities.

Krebs noted that 911.re-operated multiple pay-per-install programs and paid affiliates to bundle its software with other programs to generate a steady stream of proxies.

Soon after Krebs' report, 911.re informed users about reviewing its network and implementing new security measures to "prevent misuse" of its services, along with closing new user registrations and proxy balance top-up.

"We are reviewing every existing user, to ensure their usage is legit and in compliance with our Terms of Service," the notice read.

Many users complained that they could not use the service after the company's public notice. On July 28th, the website announced a permanent shutdown of its services.

How to choose a safe proxy service?

I recommend you use a professional premium residential proxy, it's actually the exact opposite of a free proxy. It's fast, reliable, transparent, and completely secure. Most of the problems listed in free proxies are security related. Premium proxies offer unparalleled protection, and they themselves are responsible for keeping your data as safe as possible. Data security is both a value-generating attribute and a factor that, if ignored, can cause serious trouble for proxy providers.

If you need a high-quality residential proxy, we recommend [PIA Proxy Manager](#), a military-grade encrypted network that provides you with a true Internet Service Provider (ISP) IP. Residential proxies provide the highest level of anonymity to protect your real identity from detection.

PIA Proxy Manager offers rotating and sticky proxies, giving you ultimate control and flexibility. By avoiding IP bans, you can perform any bulk online task efficiently and quickly.

Why do you need PIA Proxy Manager?

- The world's number one 50 million residential agent
- Best proxy manager for bulk projects
- Hide your IP address and location anytime
- Easy to use, one-click quick connection
- No user logs are kept, protecting your online privacy
