Aiming to boost sustainable STEM education culture and promote tech-sports across, **6th edition of world's largest Robotics Championship – TechnoXian’22** organized by All India Council for Robotics & Automation (AICRA) with the support of Ministry of Electronics & Information Technology (Meity) at **Indira Gandhi Stadium Complex, New Delhi** on **21st and 22nd Aug’22**

2 days of tournament has witnessed more than 7200 young participants from 15 countries. 1452 Teams prepared themselves for 9 categories of robotics competitions. 36 winning teams received **certificates from AICRA and award of INR 20 Lakhs** at the end of the tournament. Multiple international teams like Iran, Bangladesh, Nepal etc also witnessed the winning along with India.

AICRA have also introduce an International Committee of Robotics that would work upon expansion of TX RoboClubs in various countries and will start ranking them based upon their performance in various national and international tournaments. The members of such RoboClubs would be provided multilingual free online trainings on various technologies, platform to interact cross border and explore new ideas and come for competitions. These clubs would also receive lots of benefits in terms of funding and sponsorship to meet their expenses.

As per **Shri Rajkumar Sharma, President-AICRA** “TechnoXian aims at accelerating technological innovations and environment for tech-sports across. We aim to setup 10000 TX RoboClubs in 50+ countries by next year tournament and engage 1 million members. International Ranking of RoboClubs and its members would actually encourage youngsters and give them motive to explore and perform in technologies.”

In past 5 editions, TechnoXian has become one of the world's largest robotics championship event series in terms of youth participation. It accumulates youngsters from all over the world together to be part of the biggest robotics championship and commemorate with knowledge and create an unmatched ambience and aura of learning as well as competing with fun under the expert’s guidance of research personals who have proved their worth in the field of academics and industry.

Along with TechnoXian tournament, EdTech Expo also has been organized where Edtech companies and institutions got right opportunities to collaborate, forge partnerships, make deals and grow in their education processes. The EdTech Expo will provide everything that STEM needs to find a space in the ever-growing market and redefine the future.

All further updates regarding the event are available in the official online portal of TechnoXian
