

Dangbei Mars Pro Review: A smart home projector

This article will review the Dangbei Mars Pro, a smart 4k home projector, from several perspectives.

New York City, New York Aug 31, 2022 ([Issuewire.com](https://www.issuewire.com)) - Dangbei, a famous Chinese brand on the same level as XGIMI, released a new high-end projector--[Dangbei Mars Pro](#) 4K Laser Projector. As the global production of Dangbei, Dangbei Mars Pro is equipped with the highest configuration. The new product adopts the new upgraded ALPD fluorescent laser technology with 3200 ANSI brightness and near theater-grade color, it will bring the home theater to a new era of the laser projector. Many people have doubts about whether Dangbei projectors are worth buying. This article will introduce this laser projector from the following aspects, after reading this article hope to bring you some inspiration.

This particular projector consists of various features; some of which include

- Laser – being the main light source
- Brightness like no other – during the day or night

The Appearance/Outlook

The famous smart home projector by Dangbei is made of a glass IML suspension panel with an aluminum frame and aircraft-grade on the front panel. This entire outlook gives this excellent projector a very classy and high-tech style plus design.

For heat dissipation, the projector is incorporated with vents that are made into back panels and side panels. What makes the design even more convenient is how the noise of this projector is made to be reduced to 24 dB. This feature does more than only reduce the level of noise that it produces as it also helps in better circulation of air.

Furthermore, a shiny mirror formed made into a top panel and a tactical switch that is made into an upper panel is also present. While you look on the back side of the 4K smart projector, you will find yourself looking at various interfaces such as:

- 2 HDMI
- 2 USB 2.0
- 1 RJ45 LAN
- 1 3.5 mm earphone port
- 1 S/PDIF

What makes these interfaces the easiest to use is that all kinds of other devices such as video game players, TV boxes, computers, and many more devices can all fit in for use.

Image Quality

The image quality of this popular smart home projector is very vivid and clear. All of the details of the picture forming with the help of this projector are displayed exceptionally. This very projector does not only have a 4K resolution but also has a brightness level that goes up to 3200 ANSI lumens which means that the image displayed is very clear, very radiant, and has different colors that are also clearly identified even in ambient or broad daylight alongside indoor lighting.

The 4K home theatre projector offers a unique experience as it has a screen projection of 300 inches plus an astounding experience of viewing.

The projector has various smart inbuilt features such as

- auto keystone correction
- autofocus
- intelligent screen alignment
- intelligent obstacle avoidance

As all of these things are offered on their own, the user is saved from the trouble of having to adjust these things on their own. The projector has an additional outstanding characteristic which is the: TÜV Rheinland Low Blue Light Certification. This certification is granted under the guarantee that this projector eye 'friendly' as compared to the others in the market.

System Design and Features

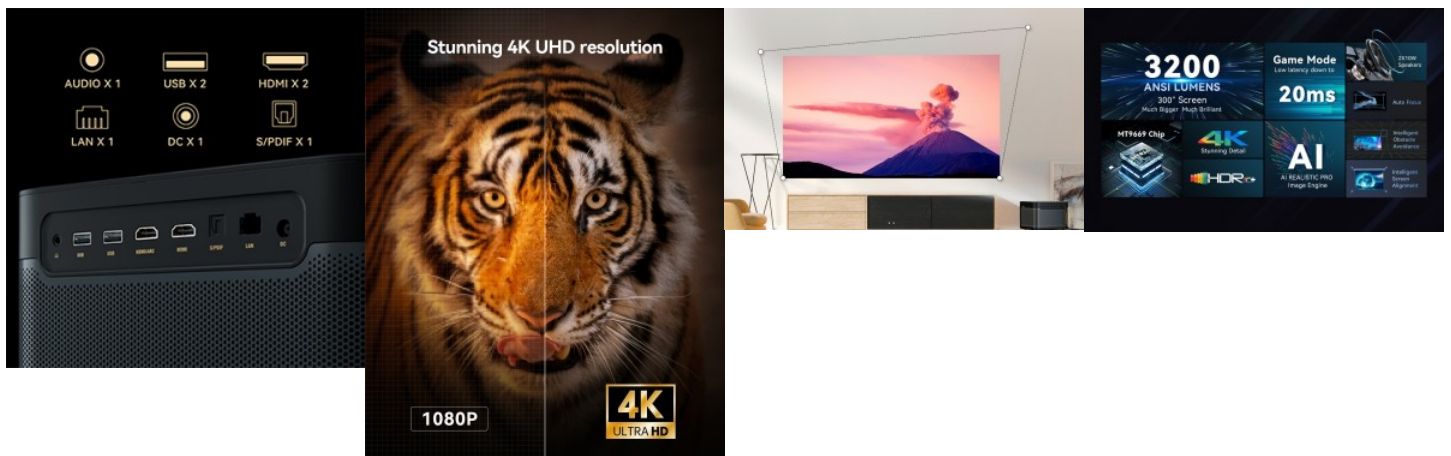

The very anticipated [4K laser projector](#) comes with an MT9669 chip (flagship) and 4G RAM and 128G ROM storage. The device is super easy for the users to operate with and is easier for them to understand. The device also allows the users the benefit of downloading multiple files and videos. It has an in-built UI assistant and operates the Android 9.0 system.

Moreover, the design and appearance of the projector are sleek but it is also very minimal with very detailed features that include

- time
- weather
- memory status

The device also provides Bluetooth 5.0 along with 2.4G/5G Wi-Fi connectivity which makes the process very smooth when connecting as it has the option of quick wireless connectivity. Two 10W speakers come along with the projector. The projector system also supports Dolby Audio and DTS for clear sound.

In conclusion, the device has many diverse and innovative features and has a vast memory space. The price of this futuristic [projector](#) is \$1,699, which is a decent price as compared to its competitors.
