

Ever Increasing Losses To Fire Leave Businesses Searching For Solutions

Steel Recon Industries offers peace of mind with state-of-the-art fire safety services.

Kuala Lumpur, Malaysia Aug 19, 2022 ([Issuewire.com](https://www.issuewire.com)) - Fire is one of the most devastating tragedies to strike homes, individuals, and businesses. Those without the aid of a company like Steel Recon Industries Sdn Bhd, commonly known as SRI, are forced to rebuild with the ashes of what remains.

In 2021 the Selangor Fire and Rescue Department dealt with 8,814 fires involving buildings and property totaling nearly RM347.7 million in losses. This was up from RM297.9 million in losses in 2020. The first four months of 2022 saw just the state of Selangor bear the brunt of RM17.9 million in building and property loss. The risk of devastating economic impact from fire is not isolated to Selangor. That same year Kuala Lumpur Fire recorded RM71 million in losses. According to Michelle Hah, Malaysian Fire Protection Association president, a fire happens every 24 minutes, resulting in an average loss of RM5 billion every year.

What are business owners to do in the face of potential loss? Insurance does what it can to make people whole, but nothing can replace years of sweat equity and hard work, years that a single fire can wipe out in a few hours. This is where Steel Recon Industries Sdn Bhd enters the picture with their specialization in fire prevention and safety.

SRI offers a variety of products, and equipment and employs a specialized team of engineers, design engineers, support specialists, and skilled technicians all with the same goal of fire safety and prevention. These highly qualified professionals work to ensure the best in design, manufacturing, delivery, installation, training, and technical support. This ensures that all their clients' fire safety needs are met. Most of the components utilized by SRI are produced in-house and when asked why SRI chose to manufacture their own equipment such as [fire extinguishers](#) instead of outsourcing Wee Chew Kiat, chief operating officer of SRI had this to say, "While we sell at a very cost-competitive price, we will not

compromise our quality because firefighting products are a lifesaving device, and we are very careful with that.”

The oversight provided by in-house manufacturing allows SRI to oversee quality control and maintain manufacturing standards while keeping costs low.

About Steel Recon Industries Sdn Bhd Though proud of their Malaysian heritage, SRI has been able to offer firefighting solutions that are tailored for global needs. This is accomplished through their vast network of distributors and has allowed over 70 countries to experience the products, systems, and tech solutions that SRI provides. Everything available through SRI has been certified by a number of international standard boards, including but not limited to VdS, LPCB, BSI, UL, and Sai Global.
