

ExcelR Expands its Digital Footprint in More Than 50 Countries With Data Science Courses

Bengaluru, Karnataka Aug 5, 2022 ([Issuewire.com](https://www.issuewire.com)) - "As Data Science has critical applications across industries, any organization, regardless of its size, requires Data Science to make decisions, analyze market trends, minimize losses, and maximize profits."

The global leader and upskilling partner for more than 200K professionals, ExcelR Solutions, marked a new milestone last week. By expanding its digital footprint across more than 50 countries, ExcelR offers live-virtual courses on data science across the world with all the advanced facilities.

According to the Harvard Business Review, at a time, 1.7 megabytes of data are generated every second, so it's crucial to know how to navigate through information, and structure, interpret, and meaningfully present them.

Thus, the aim is no matter where you belong on earth, or whether you are a fresher or working professional looking for a top-notch data science course, you can always learn it parallelly while doing your job. The support remains the same as classroom training. With this training, you gain top-notch data science skills and earn 4-in-1 certifications from NASSCOM, IBM, and AiVariant.

With the right data-driven insights, businesses can dramatically transform, target new markets, address customer pain points, boost revenue, and much more. This is why data science will always be in demand, and so data scientists are, making it the most sought-after career of 2022 and afterward.

LinkedIn's latest emerging job report ranks Data Science as the fastest growing globally and has witnessed a growth of over 650 percent since 2012. The market is slated to grow from \$ 37.9 billion in 2019 to \$230.80 billion by 2026, creating 11.6 billion job opportunities. The 21st century will be ruled by data, as it has become indispensable to many businesses and industries.

Regarding salaries, Michael Page's 2021 India Talent Trends report finds that data science professionals with 3-10 years of experience earn salaries between 25 and 65 lakh, while those with more experience can command salaries above Rs 1 crore.

"Whenever data science is combined with analytics and visualization, it's always colorful and fascinating to watch and extract data," said Ram Tavva, CEO and MD of ExcelR Solutions. Despite this, he also mentioned that now is the best time to become a data scientist since the demand for data scientists will lead to 11.5 million jobs by 2026, according to the Bureau of Labor Statistics.
