ASME Featured Product
ASME FR5

Facial Recognition has never been seen before!

The ASME FR5 Facial Recognition Reader - is designed with flexibility in mind.

Now with 5 Multi authentication factors:
•Face
•Finger
•Pin
•Mifare
•QR

The ASME – FR5 features an elegant modern design in aluminum alloy. Its advanced functionality includes
Live body detection, face tracking, and face capture. With a 1.2G Dual-Core ARM Cortex CPU face recognition is fast, less than 0.2 seconds and supports simultaneous recognition of up to 5 people! The on-board wide dynamic camera can identify users in either highly lit environments or dark lighting conditions.

Our professional access control software allows the configuration of:
• Time periods to control doors
• Dual or group combinations needed to open a door
• User access start and end dates
• Anti-passback, remote door release, door interlocking, and nested areas
• Alarms for door forced, illegal opening, or after-hours/unauthorized access attempt
• Door status reporting – open or closed
• Integration to fire protection and other systems
