Introducing New Timer Mode

We are constantly enhancing the UI and money withdrawal system to improve the user experience. It has many different and unique features already. However, there is always room for improvement. We have recently introduced a new timer mode. Now, this is a new update in the game to make it more engaging. In this mode, players can set a time limit for their game to make it more daring. You will have to finish the game before the timer sets off. This timer mode addition will be an added challenge for real game players. This way, users can finish the games in a specific period without wasting their time. Sometimes in a game, a player takes a lot of time to make a move or gets distracted resulting in a lengthy match. Timer mode helps to stay focused on the game and increases your chances of winning money as players have less time to plan moves.
