

Goda software releases a new version of Doc Sheets

Goda Software releases a new version of the most intuitive requirements management tools, Doc Sheets

DOC SHEETS

Manassas, Virginia Aug 29, 2022 ([IssueWire.com](https://www.issuewire.com)) - As one of the most popular tools for requirements management, Doc Sheets has made lifecycle management easier and more efficient than cumbersome spreadsheets, Word, and other tools. It is easy to manage and track artifacts such as test

cases, requirements, and tasks with Doc Sheets since it provides complete version control and traceability. This comprehensive platform offers benefits and competitive advantages that no other requirements management tool can match.

System analysts and business analysts now have access to several new features in Doc Sheets, one of the world's most effective requirements management tools. New features include automatic generation of documents with tables of contents and automatic conversion of existing word documents into Doc Sheets.

Doc Sheets solves complex problems related to project management, requirements definition, design, and testing.

Doc Sheets is part of Goda Software's enterprise lifecycle and [Requirements Management Tools](#), which companies worldwide use.

Doc Sheets provides a unique toolset for managing requirements. Some of the features of this software are as follows:

- Interface designed for ease of use
 - You can automatically import documents from Word files and spreadsheets, which helps you save time.
 - The software enables auto-generation of specifications with TOC.
 - Suitable for both agile and non-agile processes
 - The software can deal with large projects.
 - It offers superior performance and high security.
-
- This software can work from any PC, Mac, or tablet.
 - Change management is automated.
 - Gap, traceability, and impact analysis tools are available.
 - Moving from the document process to Doc Sheets is simple.

The Doc Sheets [requirements management software](#) is suitable for customers with a wide range of budgets.

About Doc Sheets:

Goda Software's Doc Sheets is a life cycle management tool. In comparison to a spreadsheet, it is easier to use. Managing artifacts (such as requirements, test cases, and tasks) is made possible by full traceability, version control, and collaborative tools. Doc Sheets is widespread in various areas, including product development, medical device development, workflow analysis, agile and non-agile software development, and more. The advantages of this comprehensive tool are unmatched in terms of benefits and usage by any other resource. Doc Sheets offers a straightforward, user-friendly alternative to competing technologies' complicated and expensive learning curves. Its full life cycle support is simple to implement into your project.
