

How to promote and grow your NFT project? Use Social Media Bot from PELock!

How to promote and grow your NFT project using Social Media Bot on social media sites like Twitter, TikTok, LinkedIn, SoundCloud, GETTR, Gab, Sina Weibo.

New York City, New York Aug 8, 2022 ([IssueWire.com](https://www.issuewire.com)) - PELock company specializes in creating automation solutions for social media & NFT using state-of-the-art technologies for marketing and promotion purposes. We would like to show you a video presentation of how to grow your **NFT**

project on Twitter and TikTok using the [Social Media Bot](#) browser extension for Google Chrome and Mozilla Firefox.

One of the most important aspects of the NFT movement is **growing your project**. There are many ways to do it, but you want to make sure you are creating something with the intention of marketing it to the public. Marketing is all about getting your product out to the public, and it can be done in many ways. One way to start marketing your NFT is to use **automation tools**.

What is Social Media Bot?

Social Media Bot is an automatic growbot for social media platforms such as:

- Twitter
- TikTok
- Gettr
- LinkedIn
- SoundCloud
- Sina Weibo
- Gab

It is a browser extension (also known as a plug-in) that automates your typical social media activities. You can use it on your **Mac** and your **PC**.

How to promote the NFT project quickly?

The tutorial shows how to use automation to leave **Likes**, **Retweets** & **Follows** actions to grow your followers.

YouTube link <https://www.youtube.com/watch?v=bShLx11OhMA>

Leave likes, retweets & attract new followers

You will quickly attract a group of new followers by automatically and mass liking other users' posts, selected #hashtags, auto-retweets, and automatically following other users' fans.

It's human nature; if you click likes **for others**, they'll do the same **for you**.

Human-like behavior will keep your account safe

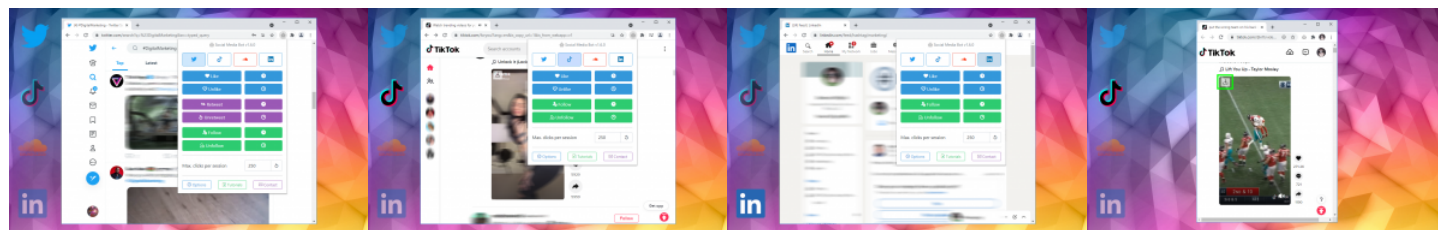

The bot is not the magic stick. Use it wisely, don't leave 1000000 likes per day, because the social media sites will put a temporary ban or a shadowban.

Lower the daily like counts and run it in **infinite cycle/scheduler** mode with rest periods in-between.

All operations are carried out directly from your computer and your IP address as if you were carrying them out yourself. This way, you can be certain that your account will not be suspended.

Install Social Media Bot and try it yourself!
