

Intex introduces TW 16000 FMUB 160W 2.0 Tower Speaker with Mic, Aux, FM, USB, BT v 5.1

Intex technologies have announced the release of TW 16000 FMUB 160W, a new-gen power tower speaker, the ultimate party partners!

Delhi, India Aug 1, 2022 (Issuewire.com) - Intex technologies have announced the release of TW 16000 FMUB 160W, a new-gen power tower speaker, the ultimate party partners! It is designed in a way, that lets the user take full control of the music with a modern-looking IR remote!

Intex Technologies have invested decades researching and developing power-packed technologies and delivering the finest sound experiences in all major spaces and connecting with the performers and listeners alike!

Sound Output

Intex Tower speakers provide the user with a dramatically enhanced sound experience. It is optimized as your perfect party partner and comes with a stunning and informative LED display, modern v5.1BT connectivity, and a fully functional IR remote, making this anyone's go-to choice. With such modern Bluetooth technology, users can also connect it to a TV4, smartphone, or music player to enjoy favorite movies, shows, and playlists.

The two mics come with cutting-edge audio signal processing that reduces echo, delivering crisp and clear voice quality. One could also control the mic during a Karaoke session or while simply giving a speech by humbly clicking on the Mic buttons.

Easy to Install

These latest tower speakers are the New-Gen speakers. With party sessions being planned at the drop-of-a hat, these are ready to be installed in no time and operate on a low-watt supply. The speakers can be placed aesthetically around a room due to their modern style. To ensure music keeps playing even with no data connectivity, it comes with an Aux cable, to simply play music from your mobile or tablet.

Lightweight

TW 16000 FMUB is very lightweight and easy to carry since it is majorly touted as the “perfect companion for home parties”. Its sleek yet modern design allows one to carry this from one place to another without embarrassment. It has a strong and sturdy outer body, saving it from possible internal damage.

Pricing & Availability:

The TW 16000 FMUB 160W 2.0 Tower Speaker with Mic, Aux, FM, USB, BT v5.1 has a retail price of Rs.16,499 only and is available to order in stunning black color.

About Intex Technologies-

Intex Technologies is an Indian multinational electronics manufacturing services company that manufactures consumer electronic products like headphones, home theatre systems, and speakers. The company was founded in 1996 by Mr. Narendra Bansal and is currently headed by Mr. Keshav Bansal. It is headquartered in New Delhi, India.

With an innovative bend of mind, the company directors sought to expand its consumer durables portfolio to enter the LED TV business seeing a massive growth of over 150%. With that, they further improved their operations in research and development, engineering, sales and marketing, and customer service which is of utmost importance to them. They ensure to make products that are of high quality, durable, and environment friendly.
