

Leawo August Deals Offers Up to 50% OFF PhotoIns for One-Stop AI Photo Editing

During Leawo August deals, people can get up to 50% off PhotoIns to edit photos through AI technology, free Screen Recorder to record any activity on computer screen, and other up to 70% discounts for comprehensive multimedia solution.

Shenzhen, Guangdong Aug 9, 2022 (Issuewire.com) - August is widely considered to be the best month to travel of the year. Many destinations are enjoying their peak summer temperatures - music festivals in full swing and the beaches packed. It is also the best time for a family holiday, as August is a part of the summer holidays. For people who go out for fun in August, taking pictures is always an essential part – capturing the scorching sun and the rolling waves. In order to meet the retouching needs of different people, Leawo Software, a leading developer and supplier specializing in multimedia solutions and data management software, specially offers their PhotoIns with a 50% discount in [Leawo 2022 August Giveaway & Specials](#). In addition, for more multimedia needs like downloading videos for offline viewing and downloading music for offline listening, other up to 70% discounts are also offered at this event. The following content will mainly focus on the PhotoIns as demand increases.

As the most intelligent photo editor, [Leawo PhotoIns](#) currently is a 3-in-1 photo solution package that contains Photo Enhancer, Photo BG Remover, and Photo Enlarger. In general, it is able to automatically enhance photo quality, remove and change photo background, and enlarge photos by up to 40X. For a limited time, it costs only \$54.97 with a 50% discount. For those who just want to buy a single item, a 40% discount is also available on all modules. Each module is described in detail below.

- [Photo Enhancer](#) is an intelligent and one-stop AI photo enhancement program to batch improve photo quality in one click. As a portrait enhancer, it can retouch skin, remove freckles, enlarge eyes, adjust lighting, and more. As a landscape enhancer, it can fix photo exposure, optimize

photo colors, remove haziness and fogginess, boost photo contrast, and so on. As a RAW enhancer, it can fix lens-related problems like distortion, chromatic aberration, etc. As a JPG enhancer, it can reduce noise and sharpen details.

- [Photo BG Remover](#) is a smart and professional photo background remover. Thanks to the advanced algorithm, it provides a precise and automatic solution for batch background removal. After loading source photos, it will automatically analyze the images and detect the clipping edges, then isolate the foreground into a transparent background. Users can then change the photo background to any solid color or photo. What's more, it also supports manual adjusting on background removal and foreground/background editing.
- [Photo Enlarger](#) is an AI-powered image more upscale to batch enlarge images by increasing image resolution instead of simply enlarging pixels. With the help of deep-learning AI technology, it can automatically improve color rendering, reduce artifacts and enhance detailed texture after upscaling images. Furthermore, it can fix blurry and grainy images, as well as enhance photo quality, by contrast, sharpness, and brightness optimization, either automatically or manually. Plus, driven by hardware acceleration, it can process photos 5x faster.
