

Martin A. Malz, MD, an Internist in Private Practice

Get to know Internist Dr. Martin A. Malz, who serves patients in Naples, Florida.

New York City, New York Aug 24, 2022 ([IssueWire.com](https://www.IssueWire.com)) - With over 30 years of experience providing medical care in the Philadelphia area, Dr. Malz now serves patients in Naples, Florida, providing the same highest possible degree of health care. Unlike most practices, he believes that just prescribing medications is not the answer to good health and longevity. He takes time to listen, diagnose with precision, and prescribe medications only if necessary.

Although his special interests are in hypertension, cardiovascular, diabetes, cholesterol, and obesity-associated problems, he is passionate about providing holistic, all-encompassing medical care. He also serves as a United States Civil Surgeon helping all new immigrants with an initial medical evaluation thus helping them along the way to become productive new citizens.

Pertaining to his educational pursuits, Dr. Malz graduated from La Salle University with a Bachelor of Science degree in 1974, and attended the Pennsylvania College of Optometry, earning his Master of Science degree in 1976, and his Doctor of Optometry degree in 1978. He received his medical degree from the Jagiellonian University Medical College in Poland in 1984 and completed his internship and residency in internal medicine at Mercy Catholic Medical Center in 1989.

Since then, he has been in private practice in Philadelphia and Collingdale, Delaware County, Pennsylvania where he cared for thousands of patients. It has always been his passion to relieve pain and suffering. In 2014, he became a Certified Medical Examiner for the US Department of Transportation, ensuring that commercial drivers are fit to perform their duty. The same year, Castle Connolly listed him among America's Top Doctors.

As a testament to his continued education, the doctor is board-certified in internal medicine by the American Board of Internal Medicine (ABIM). The ABIM is a physician-led, non-profit, independent evaluation organization driven by doctors who want to achieve higher standards for better care in a rapidly changing world.

Internal medicine is the medical specialty dealing with the prevention, diagnosis, and treatment of adult diseases. Physicians specializing in internal medicine are called internists. They manage and prevent common and complex diseases by providing comprehensive care and promoting overall well-being.
