

Sixscape accepted as Thales Accelerate Technology Alliance Partner

Singapore, Singapore Sep 4, 2022 ([IssueWire.com](https://www.issuewire.com)) - Sixscape Communications, a developer of PKI automation, management, and deployment solutions across IoT, encrypted email, password-less authentication, and secure unified communications announces acceptance into the Thales Accelerate Technology Alliance Partner Network.

“We have a strong existing partnership and a number of joint partners and customers with Thales, so it made perfect sense to strengthen the relationship, go to market and increase our joint reach, extend partner networks and grow our customer base” stated Dean Bell, CEO of Sixscape.

Sixscape’s solutions integrate with the Thales Luna 7 and cloud-based HSMs for secure private key storage across the entire Sixscape solution set. This provides customers with 360-degree security across all of their PKI-based deployments ensuring the private keys of ‘people and things’ are protected at all times.

“Our enterprise customers demand the highest security, assured privacy, and alignment with compliance standards, all at scale, at speed, and with minimal end-user impact while allowing the technical deployment and management to be seamless. That’s exactly what we do, and strengthening our partnership with Thales allows us to execute on this” continued Bell.
