

Cloud Based School ERP-Radical Logix Present Top-Notch ERP Solutions for Schools

Radical Logix is a Cloud-based app development company based in Noida, Uttar Pradesh, India. They have established themselves as premier app solutions providers for various niches with mobile-based ERP solutions for institutional management.

Noida, Uttar Pradesh Sep 14, 2022 ([Issuewire.com](https://www.issuewire.com)) - Schools are busy places for students and parents for enquiries, registrations, admission, examination information, and much more. Moreover, staff also needs to approach the management for various coordination purses. The manual management of fees, deposits, registration, and other functions in the school is a traditional and tedious process. Moreover, it may involve human errors. But, with cloud School ERP, you got practical, easy, and accessible solutions for the management of the entire school functioning flawlessly and efficiently.

The best part about getting School ERP-based solutions from Radical Logix is that they offer follow-up services, prospectus sales, website integration, and approvals for advertising. A spokesperson from Radical Logix explained how software could help schools get more traction and have better operational management.

The ERP will integrate the inquiry to your website, meaning you can see the data in a single place in place of managing enquiries of emails. He said that their team is available 24 *7 to provide for any customizations to meet your school's unique requirements. The school management can also understand the right platform from which inquiries are coming, like how many percent of enquiries come from social media, office front desk, website, and more. The software RRP collects all relevant data and provides customer reports. That's why we have the best solutions.

This software gives you all the operational details for different departments of your school in one place. You can learn about admission management. It also provides a digital locker to keep the important documents safely and show them only to authorized personnel. Furthermore, the software has TC and certificate management modules. Parents can choose for online school fee payment through contactless methods. Moreover, you will also have a fee collection report module integrated with SMS alerts. The software records the biometric attendance of staff and student attendance.

It has a student web portal, examination management, and more. It is virtually the best way to manage all your school tasks with access to all vital information anytime and anywhere. Click on <https://www.radicallogix.com/> to learn more about **Cloud Based School ERP software**. You can't miss it to get better at your school.
