

Dangbei Mars Pro : An Home Projector with 3200 ANSI Lumens

Dangbei Mars Pro is a stunning home projector with 3200 ANSI lumens and this article also will review other features of this projector.

New York City, New York Sep 18, 2022 (Issuewire.com) - With the improvement of living standards, many home users the creation of large screen viewing needs more and more eager, compared to the bulky and single function of the traditional projector, intelligent home screen projector gradually into family life, becoming a more cost-effective alternative to the large screen TV.

Dangbei has released a flagship projector ----[Dangbei Mars Pro](#). What's so different about this home projector with many smart features? This article will review this projector and bring you some inspiration for creating a unique home theater.

Appearance

The main part of the [Dangbei Mars Pro](#) is wrapped in a grey and black aluminum material. The top is made of aircraft aluminum, and the 4K logo in the upper left corner clearly shows that this projector has a 4K resolution.

The 2.5D nano glass top cover is delicate to the touch and generous and stylish. The front of the projector has a suspended design and the lens is covered with glass to prevent dust from entering the

lens and affecting viewing, a high-end and thoughtful design.

The Dangbei Mars Pro is a home projector with a row of rich and useful interfaces at the back which are:

- 2 HDMI
- 2 USB 2.0
- 1 RJ45 LAN
- 1 3.5 mm earphone port
- 1 S/PDIF

Multiple interfaces can meet the needs of multi-device users, colleagues can connect game consoles, USB, and other devices, especially the most demanding users of the high-definition picture, you can watch more HD local video.

Picture Quality

The [Dangbei Mars Pro](#) home projector features the flagship processing chip **MT9669, an ALPD laser light source, 3200 ANSI lumens, and a large memory of 4GB RAM + 128GB ROM.**

The projectors in our daily life mainly use three kinds of light sources: LED light source, laser light source, and traditional lamp light source.

Traditional projectors use is the light bulb light source, characterized by high brightness, bright colors, but short life, bulb heat serious, the projector will also be more significant, very unportable. LED viewing projector is also the mainstream of the projector market, long life color saturation, and better detail, the projector is also small and delicate many. The laser light source of the projector life is longer, the picture color presented is also more accurate, and the overall picture brightness is higher, but due to the higher cost of this type of light source, so the price of laser projectors will be more expensive.

System

The Dangbei Mars Pro is powered by Emotn OS, a system with a wealth of built-in resources. This home projector also has many smart features: **autofocus?auto keystone correction?intelligent screen alignment and intelligent obstacle avoidance.**

Vision protection has always been a point of concern for users when viewing large screen images. Electronic products should be used as much as possible large-screen electronic products, are the order of priority for the projector, TV, desktop computers, laptops, tablet PCs, and cell phones.

Projector through the reflection of the image so that the human eye to see the picture closer to the natural, softer light, even if a long time watching will not produce visual fatigue.

For families with children, the main concern is whether the projected light source will hurt the eyes, so Dangbei Mars Pro 4k home projector has an eye protection mode, the machine will automatically dim the light when a child passes in front of it, and issue a prompt.

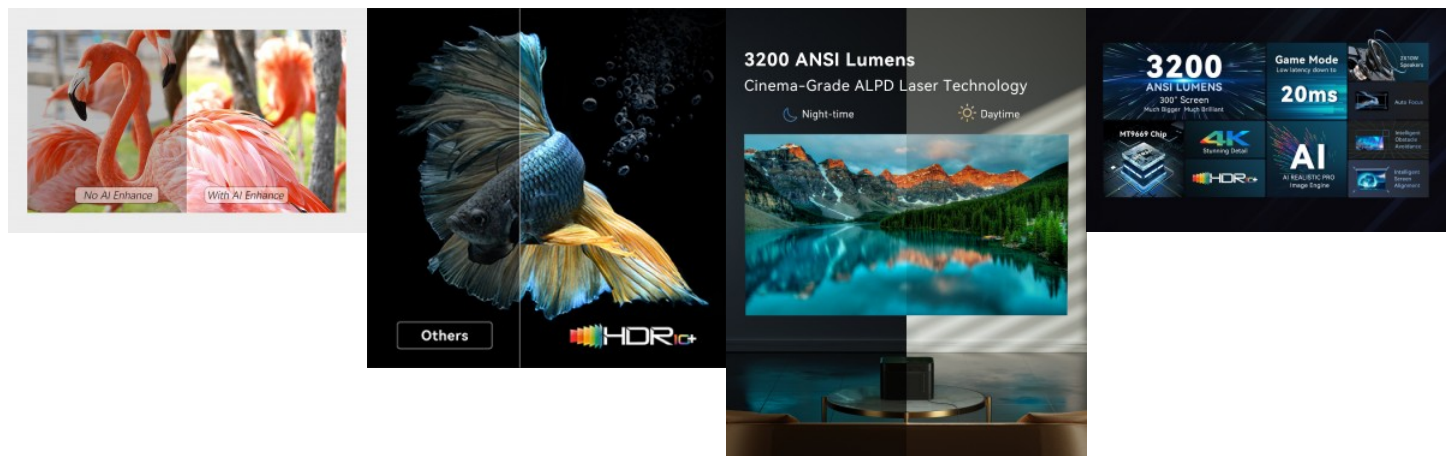

[Dangbei Mars Pro](#) supports motion compensation mode, which is very friendly for users who like to watch fast-moving images, such as ball games, racing cars, action movies, etc.

After the motion compensation is turned on, the screen is output by the chip based on the algorithm to

accurately determine the trajectory of the motion in a variety of complex high-speed dynamic images, to make a reasonable intelligent frame, thus making the viewing of fast-moving images more smoothly will not produce a dragging situation

Sum up

The Dangbei Mars Pro [4k laser projector](#) has become standard with strong advantages in terms of resolution, motion compensation, keystone correction, and automatic screen entry. The Dangbei Mars Pro is a laser projector, which is a new display technology in the projection industry that can reproduce the affluent and vivid colors of the objective world most realistically, providing a more stunning expression.
