

Dangbei X3 Pro won the Smart Life Innovation Product Award of China Electronic Video Industry Association

New York City, New York Sep 7, 2022 ([Issuewire.com](https://www.issuewire.com)) - [Dangbei](https://www.dangbei.com) is currently one of China's well-known value-added smart big screen service providers, and the hardware and software launched under it are well-loved by users. Among them, the newly launched **Dangbei 4K Laser Projector X3 Pro** was recognized by China Electronic Video Industry Association and won the Smart Life Innovation Product Award.

Dangbei X3 Pro, a 4K laser projector, is Dangbei's high-end projection, aggregating various technologies, and innovations in hardware and software, with high image quality performance.

X3Pro is equipped with a high-performance processing chip MTK9669, which can provide up to 3200 ANSI lumens and 4K resolution images, and a large storage combination of 4+128GB. In addition, the X3Pro is equipped with Dangbei's self-developed Dangbei OS system, featuring "light, fast, and free", and aims to bring users the best operating experience.

Dangbei's 4K laser projector X3 Pro has won this award, which is not only the recognition of the China Electronic Video Industry Association to Dangbei but also will inspire Dangbei to keep moving forward on the road of product development and innovation to bring better, faster and smarter projection products to the majority of users.

In addition to winning awards in China, Dangbei is also working hard in the international market. In 2021, Dangbei revealed a powerful 4k laser projector--[Dangbei Mars Pro](#), which is the global version of the Dangbei X3 Pro.

Dangbei Mars Pro is designed with a classy appearance and a whole-glass lens, like a calm professional gentleman. Its appearance complies with its excellent performance.

Dangbei Mars Pro is powered by an MT9669 chip and a huge memory of 4G RAM and 128G ROM, ensuring the most fluent and smooth operation of the projector.

It also adopts DLP display technology and uses an ALPD laser as the light source with a long lamp life of over 20,000 hours.

Most importantly, it is rated at 3,200 ANSI lumens, which is extremely rare in the projectors industry. The high brightness promises the best image performance in various light conditions.

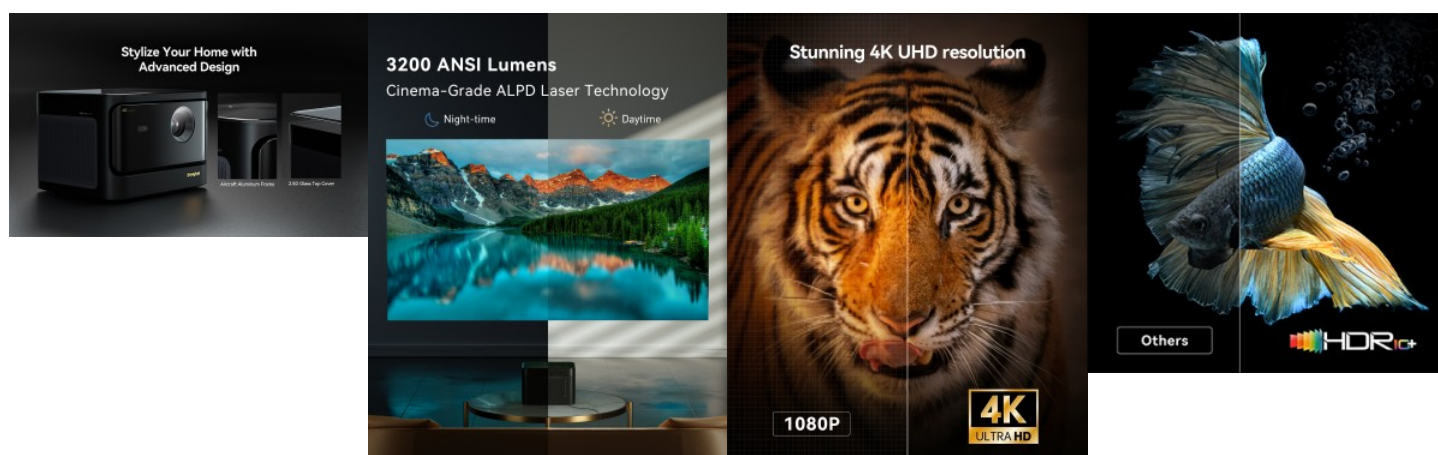

As the biggest feature of Dangbei Mars Pro, 4K resolution ensures the projection image with high definition. The tiniest details can be shown perfectly on a large screen.

In addition, it supports HDR 10, HLG, MEMC, and intelligent obstacle avoidance, which makes the image much more exquisite.

In terms of sound, it adopts a built-in 2x10W high-power audio that combines with Viper sound to deliver cinema-quality sound.

As for interfaces, USB 2.0 ports, 3.5 mm Earphone ports, HDMI (eARC) ports, S/PDIF out, and RJ45 LAN ports are all available in the Dangbei Mars Pro.

In the future, [Dangbei](#) will make unremitting efforts to bring more and more intelligent large-screen products to global users.
