

Discover Countless Opportunities for your Business Growth with Protolabz eServices

Mohali, Punjab Oct 6, 2022 ([Issuewire.com](https://www.issuewire.com)) - Protolabz eServices is one of the leading IT organizations providing services to clients globally for over 7+ years now. It has been providing services such as Web Development, Web Designing, Mobile App Development, Software Development, and Digital Marketing. Established in 2015, the organization starts gaining momentum in a short period.

The organization has helped many start-ups, diverse brands, and institutions start-ups for empowering their business worldwide. It has delivered successful business outcomes for clients worldwide.

Here are the major industries where we have helped businesses build a solid web presence for growing their business.

Food delivery business - Food delivery/ordering apps have changed the food industry and emerged as one of the fastest-growing industries. Online food ordering and delivery applications made by our team have helped many start-ups and reputed businesses for growing their business.

Some of the applications include –

Instaserve – Instaserve web application made by Protolabz eServices helps customer to place an order from an E menu with QR code scanning. It helps to maintain a safer and hygienic dining experience by eliminating any direct or indirect human contact as booking a table and placing an order can be done with the app.

Xeat - This app also allows customers to order food from restaurants online.

Education Apps - An education application provides an effective management system for redefining the education system. A management system helps organizations and institutions for developing an effective learning ecosystem.

Our education applications include –

School management system – The school management system made by Protolabz eServices is one of the best ERP and best-in-class mobile applications for educational institutions such as schools, coaching, and colleges around the world. It is one of the best education management apps designed for better interaction between Students, Teachers, Parents, and Management. Teachers can provide timely homework as well as build a better relationship with the parents. Parents can also get information about their child's progress as well as schedule meeting with the teachers easily.

Entertainment Apps - We provide media and entertainment apps that will make your brand stand out from the crowd. Feature-loaded entertainment apps help brands to engage their users.

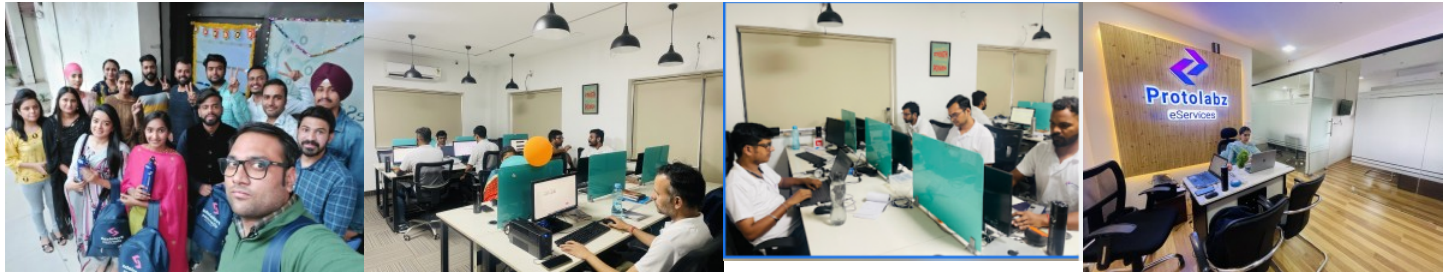

It includes –

Fan2Stage App - The Fan2Stage system is a two-way virtual reality platform using the first F2S server. This Virtual audience system was designed to bring fans virtually to entertainment venues, sports venues, theatres, and even home-based entertainers. No matter where the audience they can give feedback to the performer and the performer can hear it as well.

Healthcare Apps - We provide customized healthcare applications for improving patient care.

Ottawa Therapy connects - Ottawa therapy connects provides an easy and stress-free way for individuals to connect with psychotherapists, social workers, and psychologists with the help of an online appointment system. Qualified mental health professionals can register themselves on this platform for gaining access to the clients.

We have also developed various E-commerce, Social Networking, Travel as well as On-Demand applications also.
