

eFlair named as one of the Top Mobile App Development Companies In India

eFlair, an upcoming web and mobile development agency has been featured as the best mobile app developer in India

Vijayawada, Andhra Pradesh Sep 16, 2022 ([Issuewire.com](https://www.issuewire.com)) - eFlair (eFlair Webtech Private Limited), a fast-growing web and mobile development agency headquartered in Bangalore, India, has been consistently listed among the best mobile development companies in India by [Hindu](#), [Hindustantimes](#), etc.

Today, Apps have become the definitive way to conduct business at all scales; old school companies and new age startups are bound to have a mobile app that has to deliver the goods or services intuitively to the new age customer.

Thanks to a handful of mobile app development companies, it's easy to have an app developed for you. Today, we will look at [India's best mobile app development companies](#), where eFlair Webtech has been cited as the top contender.

Best app development companies in India

[eFlair Webtech](#)

eFlair started operations in 2011 and consistently delivered state-of-the-art web and mobile-based software that flaunts millions of daily users. They have worked with a wide array of clients, from startups

to large corporations. They are young and always learning, and the evolution of their designs and delivered software speaks for itself.

Codewave Technologies

Founded in 2015, Codewave Technologies is a Bangalore-based app development company specializing in UX/UI design and mobile and web development. The main portion of their clientele falls into healthcare, education, and financial categories. They have their own cloud system for integrating time-tracking apps. You can hire them to create both iOS and Android apps.

TechAhead

This Southern California-based mobile app development company also has an office in India. Since 2009, their developers have been focused on UI/UX design. TechAhead happens to be one of the world's largest companies, trusted by several Fortune 500 clients. One of their specialties is developing scalable apps at an unprecedented speed.

Lollypop Design Studio

Based in Bangalore, India, Lollypop Design Studio has been creating some of the best front-end interfaces focused on UX through which powerful automation software can be controlled.

Accenture

Formerly known as Digital, Accenture is a multinational company based out of Ireland. IT consulting is one of their main focus fields, but they also house some of the best top app developers.

Appinventiv Technologies

Specializing in iOS apps, they have worked with many startups and Fortune 500 companies to turn their vision into reality. Starting in 2015, the company now houses 650+ tech experts and has over 1000 successfully completed projects. Their forte is IoT, machine learning, and AI-related.

Capgemini

Capgemini is one of the leading multinational IT companies based out of France, offering digital transformation, IT consulting, technology, and engineering services. The company's vision is to pave the way to a sustainable future through technology.

CognitiveClouds

Since 2012, CognitiveClouds has remained one of the best app development agencies in the mobile space. With a base of operations in India, their team of 70+ experts provides a broad range of services, including web, app, and UX/UI development services.

Algoworks

With one of the highest customer retention rates in the industry, Algoworks has successfully developed hundreds of apps. This has earned it an honorable mention in Deloitte.

Intelivita

Intelivita's operations have extended their global reach since its launch in 2014, including India, with a central base of operations in the UK. Their small yet dedicated team specializes in mobile app development, web development, and AR/VR. However, UI/UX design is one of their strongest focus areas.

The above are just a few companies from the [top mobile app developers](#) list, as seen on Hindu; for the full list, please click through and have a read.
