Chiropractic is a form of alternative medicine that mainly deals with diagnosing and treating mechanical disorders of the musculoskeletal system, especially the spine. Chiropractors use spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain, back pain, headaches, vertigo, and a long list of other ailments and conditions. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself naturally, without medication or surgery.
