

Introducing The NAUTILUS-CAR The World's First Luxury Electric Rickshaw Sedan

Kokstad, Bergen Sep 14, 2022 ([Issuewire.com](https://www.issuewire.com)) - Norvald Waldersnes, President and CEO of NAUTILUS-CAR A/S announced today the expansion of its independent distributor network in preparation for deliveries of its new NAUTILUS-CAR, the world's first luxury electric rickshaw sedan. "Our sales strategy is very different from the rest of the electric vehicle industry, as our independent distributor's simply parked their newly purchased NAUTILUS-CAR in high foot-traffic locations like the beach or a vintage car show event, so they can tell as many people as possible about the eco-friendly NAUTILUS-CAR," says Waldersnes, "This allows us to ensure consumers interested in learning more about the NAUTILUS-CAR, will receive an amazing eco-experience from the moment they unplug the vehicle and go for a spin," said Waldersnes.

The NAUTILUS-CAR was designed from the ground up as an electric rickshaw sedan. Engineered for performance, it offers a premium ride, and great handling, and accelerates from 0 to 33 miles per hour in as little as 66 seconds. With seating for the driver and two adults or with three children in the rear seat, plus ample cargo space, the NAUTILUS-CAR blends smart nautical design with cutting-edge technology. The aerodynamic hard-shell design is certified by the International Rickshaw Association.

The NAUTILUS-CAR is offered with three battery pack options to suit a variety of drivers' needs and can be recharged using any conventional 110V/220V Power Outlet. Nautilus independent distributors will travel to customers' homes or offices to demo the electric vehicle. The NAUTILUS-CAR takes its shape from the marine Chambered Nautilus Shell, which is our nautical inspiration.

About NAUTILUS-CAR A/S

The NAUTILUS-CAR is designed to be as functional as it is beautiful. Special attention has been given to refining the aerodynamic character of the body for the NAUTILUS-CAR. The outcome of this effort is a balance between added downforce, which enhances vehicle stability at higher speeds and reducing drag, which affects both performance and efficiency. Our mission is to inspire the adoption of sustainable energy by creating advanced technologies and the most captivating luxury electric rickshaw vehicles centered around the human experience.
