

Knot Solutions announces global launch of RaptrDXP™, its Digital cloud BSS platform offering for MVNOs and CSPs.

Hyderabad, Telangana Sep 7, 2022 ([Issuewire.com](https://www.issuewire.com)) - Indian-based Knot Solutions a leading Business Support Systems (BSS) and solution provider to the global Telecom Industry, today announced the commercial availability of its Telco cloud BSS digital experience platform for Mobile virtual network operators (MVNO) and communications service providers (CSP).

RaptrDXP™, from Knot solutions, helps MVNOs and CSPs quickly reach efficiencies of scale by leveraging out-of-the-box BSS modules and functionality, to seamlessly support all its growing business and operational needs. Available as a SAAS offering in both private and public cloud, the multi-tenant platform comes with out-of-the-box functionalities to support innovative revenue streams, product, and partnership offerings.

Telecom service providers are looking at new ways to increase revenues and retain customer loyalty. **RaptrDXP™** with its open and virtualized architecture promises lower operating costs, intelligent process automation, and agility for a 5G world.

“Despite huge investments in IT and business support systems, operational telecom revenues are seeing a decline. Creating new revenue streams with new digital service offerings requires agility and flexibility from BSS systems that comes without the burden of legacy and long implementation timelines,” said **Sumanth Konuru, CEO, of Knot Solutions**. “**With RaptrDXP™**, MVNOs and CSPs can quickly scale business operations, go to market faster, and fully monetize 5G opportunities while delivering a superior customer experience. Service providers can now adopt a low-risk, low TCO approach to quickly scale their operations and time to market”, he added.

Knot solutions will also look toward partnerships to accelerate the adoption and support of its new offering.

About Knot Solutions

Knot Solutions is an Industry leader with proven expertise in providing SI & full stack enterprise Digital Business support systems for Telecommunications service providers across global markets. Today, Knot Solutions delivers large-scale digital transformation solutions that help TSP majors increase revenue streams, at lower costs and better efficiencies through a combination of consulting, products, solutions, and services.
