

Lootel - India's first smart, luxurious and hygienic space with many advantages

Lootel - India's first smart, luxurious and hygienic space with advantages of Café, Luggage room restrooms, and EV charging stations and more.

Indore, Madhya Pradesh Sep 4, 2022 ([Issuewire.com](https://www.issuewire.com)) - The technology-driven sanitation startup 'Lootel Restrooms', India's first luxury smart toilet has launched in India, the Lootel Restroom smart lounge at Smart Seed Incubation, Indore based on the Internet of Things (IoT) model, Lootel Restrooms is the world's first-of-its-kind model of the pay-and-use washroom, which promises a luxurious and hygienic space to freshen up with added advantages of Café, Luggage room, restrooms, and EV charging stations, etc.

Founded by enthusiastic entrepreneur Yashwant Suthar, Lootel Restrooms is the extension to the modern-day 'Smart Toilet' that will ensure you experience a smart washroom, which will automatically clean after every use. It completely works on the eco-friendly model that has waste management, and water-recycling facilities, where most of the operations will be powered by solar energy. On the occasion, the founder of Lootel Restrooms Yashwant Suthar said, "The perception about public toilets in India is completely gloomy. That's why we have taken this challenge to change the entire ecosystem of public sanitization. Nowhere else in the world such facilities are available. We are happy to receive this initial support where audiences of various cities are validating our unique business model by using it in mass, which will help to change Indians' experience of public toilets."

The Lootel Restrooms have signed an MoU with Govt of India to establish 'Smart Restrooms' in various cities in India. Indore, Bhopal, and Bilaspur, projects are running and a couple of projects from various cities in India are in pipeline. The company is looking to open up 100 smart restrooms across the country in the next two years.
