

MooveTrax Offers 24/7 Tracking of Rental Vehicles, Ride Shares in Real-Time

Orlando, Florida Sep 19, 2022 ([Issuewire.com](https://www.issuewire.com)) - Every car rental company has experienced at least one instance in which the vehicle wasn't returned on time. [MooveTrax](#), has solved that problem with affordable 24/7 tracking of rental cars in real-time. It's equally appropriate for car-share individuals utilizing Turo or HyreCar.

No app download is required. The device is hard-wired into the vehicle. MooveTrax will assist in locating an installer. Discreet and compact, the GPS [rental car tracker](#) enables individuals to replay the driving route of any car for the duration of its trip and to replay the driving history.

MooveTrax is equipped with a wide variety of functionalities. Companies can implement multiple commands to lock and unlock the car, disable or activate the ignition, honk the horn for location purposes, and reboot. Custom controls enable a company to set the time to start and end the rental period for each client.

Speed limits can be set and the company is notified when the vehicle is exceeding those parameters. MooveTrax also allows companies to establish geofencing boundaries. Each vehicle receives a detailed profile that includes the name of the car, its GPS ID, and VIN number, along with the make, model, and color. Mileage on the odometer is entered, along with the category of the vehicle.

MooveTrax is equally beneficial for ride shares and provides the most advanced features. More advanced than [Turo GO](#), it allows for an unlimited number of sub-users for no additional charge. It provides the ability to have different users in charge of different groups of vehicles and provides an added level of protection for ride shares.

The MooveTrax offers more features than [Turo Go](#) and provides monitoring of drivers to ensure they're operating safely and responsibly. If a vehicle is lost, stolen, or carjacked, it enables the vehicle to be recovered faster to protect valuable assets. MooveTrax is a full-featured way for rental car companies and ride-share individuals to know where vehicles are located in real-time.
