

Revex Care launches digital consent platform to help for Medical and Healthcare related query

Revex Care Founder said that "we launched digital consent platform to help every kind of medical and healthcare related query"

New Delhi, Delhi Sep 14, 2022 ([IssueWire.com](https://www.issuewire.com)) - Revexcare announced the current gap in the patient consent process and patient and doctor's awareness in India in digital format. The aim is to bring outpatient consent tools in a digital format in addition to a paper format which is not just a need of the current times but also a way forward in the future.

Keeping pace with the current environment around medical litigation and the need for detailed information around patient consent in a detailed yet easy-to-understand manner for the patient, also making the lives easier for the doctors we provide a range of products to assist health professionals in improving the doctor-patient relationship, increasing patient satisfaction and reducing the risk of litigation.

[Revexcare](#) is a brainchild of experts who foresee attaining a dominant hold in the online medical industry. Having maintained a network of talented and experienced doctors, nurses, attendants, and other caregivers, the company strives to render only unmatched at-home services with no scope for flaws.
