

Sapient Insights Group Annual HR Systems Survey Silver Anniversary Edition Spotlighted at HR Tech 2022!

Atlanta, Georgia Sep 12, 2022 ([IssueWire.com](https://www.issuewire.com)) - SAPIENT Insights Group is honored to announce that Chief Research Officer and Managing Partner and *Top 100 Influencer*, Stacey Harris, will present the 25th Edition of the Annual HR Systems Survey key findings during a keynote at this year's HR Tech Conference and Exposition, on Sept. 12-16, 2022, in Las Vegas, NV. The highly anticipated data from the study will debut at HR Tech as it has for the last 24 years.

Sapient Insights' renowned survey is the industry's most extensive global research effort for HR Technology, delivering views of current and future company plans for technology adoption, crucial practices, emerging technology trends, and the voice of the customer. The cumulative survey research represents more than 20,000 companies and 300 million employees, in more than 80 countries.

"We are thrilled to be keynoting at this year's HR Technology Conference and sharing the results with the HR Tech community. It's the people in this community that make this data a reality by participating in the survey annually," said Stacey Harris. "This year's results highlight where HR has the most impact on business outcomes."

Coincidentally, with this being the 25th year, Sapient Insights had a 25% increase in participation. Not surprisingly with the Great Resignation of 2021 and Quiet Quitting in 2022, Recruiting applications topped the charts across all size organizations for planned increases in technology spending.

"This is a constantly evolving marketplace with many vendors expanding their footprint and customers looking for the best of the best," said Teri Zipper, CEO and Managing Partner at Sapient Insights Group. "As organizations continue to enhance the employee experience, I believe we'll see more expansion and acquisition in this space and some very exciting changes in the next few years for HR technology."

The Silver Anniversary Whitepaper will be available for download in mid-October.
