

The casual game occupies half the world, and Snake Dao brings more surprises.

Seoul, South Korea Sep 9, 2022 ([Issuewire.com](https://www.issuewire.com)) - PT. SnakeDAO, When it comes to games, players may quickly be able to jump to the super productions brought by game majors such as Red Dead, Assassin's Creed, and Uncharted. However, with the increasing pressure on people's lives, mainstream games have become more and more complex under the premise that the plot and structure are getting more affluent and prosperous. Only use your brain even, many times need our full attention to remember, to find, to operate, to complete. In the game's setting, the player will always be in the sense of a tense atmosphere so that people may feel serious and depressed. This is why casual mini-games are surrounded by major game companies and still get a small world to survive. Even though casual games are not as hot and eye-catching as competitive ones, they are still wildly addictive and unstoppable. The simple and easy-to-use mechanism allows men, women, and children to open a game at any time; the short and fast game levels allow anyone to relax their state with fragments of time. So, what kind of spark will be created if casual games are combined with the hottest P2E and GameFi?

SNAKE DAO is a GameFi metaverse WEB3.0 game that combines NFT, P2E, PVP, Tokenomy, etc. Snake Dao has five qualities of snakes, which players can acquire through community airdrops, OpenSea purchases, etc. Players can enter the game by opening the game link using a browser with the wallet plugin installed or the browser embedded in the wallet app, clicking the "START" button, and authorizing a login. After logging into the game, go to the asset screen and deposit the purchased snake NFT into the game. Then you can start to experience the gameplay. OpenSea has over 10,000 NFTs, allowing players to be the brightest snake on the battlefield. The game also has the latest gameplay: to breed snakes and synthesize them. Each quality of snake can be bred except for the Bronze snake. Each quality of snake has a particular energy value. Feeding the corresponding quality of food can increase the snake's energy value. Once the energy value is complete, you can reproduce. Reproduction requires the consumption of S Coin, the food needed for the process of breeding which can be obtained by participating in the gameplay or directly buying it in the store. After you get more snakes through breeding, every 5 snakes of the same quality can be synthesized into a higher quality snake. Each quality snake has a maximum number of snakes in the chain, except for the bronze snake. After reaching the maximum number of snakes, they cannot be synthesized.

Snake Dao's first airdrop has already begun, and the game will soon be able to meet with players. Let's see if Snake Dao meets all our imagination of casual game + P2E mode in the game!
