The Norns Awards

Inspired by the values of simplicity, transparency, and fairness, The Norns Awards aims to promote and deliver Special Awards - Special Awards - to one or more people who, through their career, their professional goals, or their company's projects, have distinguished themselves for having made a significant contribution to society and a lasting contribution to the world of innovation. The Business awards, on the other hand, are dedicated to companies and their projects in the most varied categories: from Artistic to Education, from Diversity and Inclusion to Sustainability through Innovation and Quality. International Awards and Luxury Events want to contribute to the international recognition of these leaders. The idea is that the awards are a tool to lay the foundations for a network of connections between companies of a level of excellence and innovation in various countries, so rather than assigning an award, the goal is to highlight good practices and encourage realities that stand out in the world. Supporting new ideas is the most powerful way to spread the values of creativity, technology, and sustainability, and values that have not only an economic but also a social impact.
