The Water Project Saves Lives Providing Clean Sustainable Water and Protecting The Climate Providing access to clean, safe water helps capable and determined people realize the hope they have for their own futures.

Concord, New Hampshire Sep 21, 2022 ([Issuewire.com](https://www.issuewire.com)) - The noble initiative of saving lives and providing clean sustainable water is expanding with [The Water Project](#)'s new ventures. This dedicated non-profit organization is creating another project at [Mukhungula Primary School](#). A new round of funding has already started and the organization has announced project objectives, sharing 100% transparency with the contributors. This new round of funding will be utilized in various aspects of development such as community engagement, community education, project installation, monitoring and evaluation of water projects along with sanitation and awareness regarding it. The need for safe water is fulfilled by [The Water Project](#).

Every contributor to [The Water Project](#) receives an in-depth project report detailing along with the location of the effort, the technology used, the number of people it serves, photographs of the process, and everything from the start to finish. As a result, global contributors to this noble project can see where their money is being spent. This is a 501(c)(3) non-profit organization that is solely built to help, support, and empower the unprivileged people in remote sub-Saharan and African regions. The organization is currently monitoring around 1,974 water points with 96% water flowing. The agency is looking forward to creating safer and more secure water points in the coming days.

The [Water Project](#) is currently impacting around 714,350 people. More than 7,000 contributors are constantly helping to make sure access to clean water for more than 650,000 people daily. The challenges of climate change and drought make it difficult to make every project successful. However, the agency shows every outcome to let the contributors know how their valuable contribution is helping in the process. President & Founder of The Water Project, Peter Chasse, and his team of professionals are working rigorously to save thousands of lives by offering clean drinkable water in the way scientific way. Other than creating safe water resources, the organization also educates people about hygiene as well as climate change. Since it is a non-profit organization, 100% of the donations are spent on the projects. Find out more and make donations at <https://thewaterproject.org>.
