

VolumeKings Launches E-Wallet Specialist Service

London, United Kingdom Sep 30, 2022 ([IssueWire.com](https://www.issuewire.com)) - [VolumeKings](#) is incredibly excited to announce its inaugural offering in the e-wallet and iGaming industries. VolumeKings is an entirely free resource for users to get the most out of cryptocurrency, forex, online gambling, peer-to-peer (P2P), and merchant transactions all over the world.

With over 50,000 active members, VolumeKings has already established itself as a major player in the e-wallet specialist scene - and for good reason. Members are able to use VolumeKings in tandem with our partners' services to get the most out of everyday transactions, investments, and entertainment alike.

Currently, VolumeKings is partnered with Paysafe Group's premiere services, [Skrill](#) and [Neteller](#), with over thirteen years in partnership with other sites within their portfolio. Other partners include [EcoPayz](#), a six-year partner, and [MuchBetter](#), a three-year partner.

Recently, VolumeKings announced its partnership with [Astropay](#), marking the group as the first Astropay partner to serve Europe.

VolumeKings (VK) offers its users a seamless, straightforward means to be rewarded for simply using their money as usual. By connecting a VK account to an authorized partner, users gain access to VIP tiers, reduced fees, higher account limits, and a swathe of additional features, bonuses, and rewards for regular users.

About VolumeKings

The owners of VolumeKings are a longstanding partner of the most widely accepted e-money transfer services in the world. They launched VolumeKings to offer users a simple means to quickly gain access to VIP tiers, reduce account fees, and raise their limits - all for free. Founded by Dale Richardson and Paul McKenna in 2022, VolumeKings has quickly risen through the ranks of e-wallet specialists as a trustworthy name in the industry.

Between Richardson and McKenna, the pair has over 25 years of experience in the industry. This dastardly duo decided to solve an issue that stuck out like a sore thumb; e-money services, while handy, require a great deal of investment and research to use properly. And thus, VolumeKings was born. Resources and guides are readily available for new users with easily-navigable solutions for the most common questions and issues across all serviced partners.

For media inquiries, contact Dale Richardson for quotes or further information:

[MEDIA QUOTE #1]

“This is such an exciting moment,” said Dale Richardson. Paul and I have been in this industry for quite a long time, and with time comes experience in what works and what doesn’t. After so long of seeing the same questions and needs occur time and again, we felt it was time to fix the issue - and here we are!”

[MEDIA QUOTE #2]

“Whether you’re new to the e-wallet scene or are a grizzled veteran, VolumeKings has something to offer everyone,” said Dale Richardson. “We help our users get the best rates and lowest fees for using our partners’ platforms as usual - and best of all, it’s free! Those who enjoy getting rewarded - and I’m pretty sure that’s everyone - will love what VolumeKings has to offer.”

[MEDIA QUOTE #3]

“From cryptocurrency and foreign currency exchange to sending your buddy a few quid for your morning cuppa, there’s really something here for every walk of life,” said Dale Richardson. “VolumeKings stands by the principles of making things simple, beneficial for the user, and (crucially) *free to use*. Perhaps most importantly, though, is that we partnered with tried-and-true monoliths of the industry, meaning our users will get the best terms on their needs, every time.”
