

West Coast Self-Storage Makes List of Top Facility Management Companies

Everett, Washington Sep 6, 2022 ([Issuewire.com](https://www.issuewire.com)) - West Coast Self-Storage announced today that they have been named to the **Inside Self-Storage Top Operators List** for 2022, which ranks the self-storage industry's top 100 facility owners and top 50 third-party management companies by net rentable square feet.

West Coast Self-Storage came in at 9th place in the third-party management rankings, moving up one spot from the 2021 survey. The company currently manages 7.55 million square feet of rentable space and over 57,000 storage units across 102 facilities. Of those facilities, 31 are West Coast-branded. Facilities are located in Washington, Oregon, California, Nevada, & Idaho.

The company plans for continued growth in 2023, estimating that they'll bring on board an additional 10-15 facilities, with a mix of company-owned and third-party managed properties.

"Our goal is not to be the biggest operator out there, but rather, to be excellent in all we do for our stakeholders. If we grow as a byproduct of doing this, then we're happy with that. With the number of stores we have now, it allows us to share our West Coast Self-Storage experience with more customers," said John Eisenbarth, Vice President of Operations for the company. "We believe we offer

quality storage products and the highest service in the industry.”

West Coast Self-Storage Group is a self-storage property management, acquisition, and development company headquartered in Everett, WA. The links to their websites are WestCoastSelfStorage.com and SelfStoragePropertyManagement.com.
