

What Makes Cassie's Meticulous Touch an Exceptional Cleaning Service?

Ocala, Florida Sep 27, 2022 (IssueWire.com) - [Cassie's Meticulous Touch](#) is a professional cleaning service for residential and commercial customers. Cassie and her highly trained team of workers have been serving homes and businesses in Ocala, Florida, and surrounding areas, including Gainesville, The Villages, and Orlando, for over 20 years. The fact Cassie has been successful for so many years is itself an important reason Cassie's Meticulous Touch is considered an exceptional cleaning service. But why has she been so successful for so long?

The many services Cassie offers make a big difference in her business, being helpful for so many different types of cleaning needs. You can have a basic cleaning service or one of many extras such as window cleaning, floor stripping, and waxing, lawn and garden care, patio and porch seasonal cleanup and setup, walls washed, and appliances cleaned inside and out. In an office, Cassie's team will go the extra mile when it comes to the care of breakrooms, bathrooms, and reception areas. Should an office require specialized cleaning, as in a medical or dental office, Cassie has trained teams who know the proper procedures for this type of cleaning.

Another fact that helps bring Cassie's Meticulous Touch to the level of exceptional is the availability of a schedule to suit the individual needs of a person or company. You can have Cassie's cleaning service daily, weekly, bi-monthly, monthly, or even a one-time service. In other words, you can hire Cassie's Meticulous Touch for an event setup or cleanup. A team from Cassie's will also come for a move-out or move-in cleaning. Cassie offers a free estimate of the work you need to be done and how often so you can plan what works best for your needs. During the estimate, the service cost will be discussed, and you will find Cassie's prices are reasonable and can be tailored to your budget.

Another important aspect of becoming an exceptional cleaning service is knowing how to not only clean but to sanitize and disinfect. Disinfecting, which requires using EPA (Environmental Protection Agency) chemicals, is necessary to eliminate the COVID-19 virus. Cassie's workers are trained on the differences between cleaning, sanitizing, and disinfecting. Cassie also trains her workers on when and how to use environmentally friendly cleaning methods as she is concerned about maintaining healthy earth.
