

Appex Innovation accelerates AI-driven Innovation in Health-Tech with its 'MyHealth' Patient Portal

MyHealth Patient Portal helps you digitize all medical reports, share it with providers, hospitals, clinics and family in times of need.

Mumbai, Maharashtra Oct 21, 2022 ([Issuewire.com](https://www.issuewire.com)) - MyHealth Patient Portal is a PaaS (Patient as a Service) for patient engagement and empowerment across care continuums enabling patients to digitally manage their health (booking appointments, sharing data with hospitals, providers, and families in times of need), access their personal data, and be informed about the status of their treatments. This

digital medical record platform for care coordination is integrated with HIEs, Health ID, and EMRs for a seamless patient experience, helping them to proactively manage their health.

MyHealth soon plans to launch care concierge services in India (careseva.in), which will provide a personalized healthcare manager to cater to regular healthcare and emergency needs. It will also integrate a Digital Learning Platform (DLP), which will provide relevant customized health content to the patients for a better lifestyle by providing updated information about the diseases, treatments, and care plans for living a healthier lifestyle.

Health Care Consulting

The delivery of healthcare services is becoming increasingly complicated. However, by embracing a dedicated technology-driven approach, healthcare organizations can achieve the desired results. Apex Innovation provides technology adoption across healthcare systems be it health-tech advisory, implementation consulting, learning management, or managed services. With smarter workflows and connected care ecosystems, Apex Innovation bridges the gap for solution configuration, deployment, and enhanced user experience with secured AI and Robotic Process Automation as well.

Apex Innovation offers a platform [MyHealth](#) which keeps patients at the center while offering various treatments and care plans making life easy with assisted healthcare consulting services.

About Apex Innovation

Apex Innovation thrives to be the driving force for digital transformation in global healthcare facilities for patients. It envisions a healthcare system based on enhancing and utilizing the latest technology for the benefit of patient care. For providers, it delivers innovative products and offers specialized applications to provide an effective and scalable solution to better serve its customers. Apex Innovation is a US company that has managed more than 1.8M lives on its platforms and now penetrating the Indian market with its innovative offerings in healthcare.

With its innovative healthcare solutions, it improves the delivery of care for patients, providers, health systems, and humanity at large.

Values

About the Founder

[Ankur Vora](#) brings with him about 20 years of expertise in Digital Transformation, Business Intelligence, Cybersecurity, and Technology Automation in the healthcare industry. He holds a double major in Bachelor of Science in Information System Technology and Entrepreneurship from the United States.

He is an innovative and customer-centric leader and his companies provide integrated solutions for better health care for patients. He co-founded Apex Innovation in 2013 with the thought process of launching the 'Apex - App Exchange Platform' which would provide innovative products for automating healthcare with AI-driven smart care applications. Apex Innovation is a US company that has managed more than 1.8M lives on its platforms and now it's penetrating the Indian market with its innovative

offerings in healthcare.

A unique offering of the 'MyHealth' patient portal helps users digitize their medical reports, create profiles for families in order to store the entire family's health history in one place, and help predict the type of health care based on pattern-based analytics for individuals and families. These reports can be shared with providers and families for health care advice, a second opinion, or in times of emergency. Additional features provided by MyHealth include a personalized healthcare manager who would take care of all healthcare needs making life simple and easy and providing great support in times of need.
