

Brandon Lentine, MD, an Orthopedic Surgeon with Kent Hospital

Get to know Orthopedic Surgeon Dr. Brandon Lentine, who serves patients in Warwick, Rhode Island.

New York City, New York Oct 4, 2022 ([Issuewire.com](https://www.issuewire.com)) - An experienced orthopedic surgeon, Dr. Lentine specializes in adult reconstruction, hip and knee arthroplasty, robotic joint replacement/MAKOplasty, revision arthroplasty, partial knee replacement, and hip fracture care. He can

be found on staff at Kent Hospital in Warwick, Rhode Island.

Helping his patients stay active, Dr. Lentine is energized by their stories. He chose to specialize in joint replacement because arthritis affects so many people and his work may be able to provide a dramatic improvement in quality of life.

A part of the Care New England Health System, Kent Hospital is a 359-bed, nonprofit, acute care hospital serving approximately 300,000 residents of Warwick, West Warwick, East Greenwich, West Greenwich, Coventry, and parts of North Kingstown, Exeter, and Cranston, Rhode Island. It provides high-quality, compassionate, and personalized health care delivered in an interdisciplinary model that involves all members of the health care team.

Beginning his educational pursuits, Dr. Lentine graduated with his medical degree from the Albert Einstein College of Medicine, Yeshiva University in 2015. He then went on to perform a residency in orthopedic surgery at the University of Vermont, followed by an adult reconstruction fellowship at Boston University in 2021.

With an unwavering commitment to his specialty, he is board-certified in orthopedic surgery by the American Board of Orthopedic Surgery (ABOS). The ABOS is an organization with the goal of establishing educational and professional standards for orthopedic residents and surgeons as well as evaluating the qualifications and competence of orthopedic surgeons.

Orthopedic surgery is the branch of surgery concerned with conditions involving the musculoskeletal system. Orthopedic surgeons use both surgical and non-surgical means to treat musculoskeletal trauma, sports injuries, degenerative diseases, infections, tumors, and congenital disorders.
