

# Create Ai Voiceovers Unveils Robust Library of 500 + AI Voices in Over 200 + Languages

CreateAIVoiceovers.com, a next-gen on-demand synthetic text-to-speech platform that produces very lifelike voices for education, marketing, entertainment, and overall audio content production.

**Sarasota, Florida Oct 5, 2022** ([IssueWire.com](https://IssueWire.com)) - Today, The Seaplace Group, LLC - Sarasota, Florida USA announces the launch of its newest web property. **Create AI Voiceovers.com**, a next-gen on-demand synthetic text-to-speech platform that produces very lifelike voices for education, marketing, entertainment, and overall audio content production. Content creators and product designers can engage global audiences by using more than 530 neural voices across 220 languages and variants plus numerous background music clips and special sound effects.

**Create AI Voiceovers** enable users to create the perfect voiceover for their brand and power up their stories and digital experiences with a wide variety of voice styles, accents, and languages extremely simple and cost-effective.

- Lifelike synthesized speech... Enable fluid, natural-sounding text to speech that matches the intonation and emotion of human voices.
- Customizable text-talker voices... Create a unique AI voice that reflects your brand's identity.
- Fine-grained text-to-talk audio controls... Tune voice output for your scenarios by easily adjusting rate, pitch, pronunciation, pauses, and more.
- AI Voice Generator... Run the AI Text to Speech Generator anytime 24/7/365 from anywhere in the world.
- Cloud-based deployment... On-demand delivery of TTS resources over the Internet with pay-as-you-go pricing.

Text-to-Speech technology has come a long way since the days of stiff, robotic voices. In recent years, these voices have become much more natural sounding, due to the use of deep learning in artificial intelligence. Many of the latest AI voices are almost indistinguishable from humans, and some even incorporate natural human inflections to make them sound more lifelike.

"Using **Create AI Voiceovers.com** can reduce the cost and time that traditional studio recordings require. Although it cannot replace human voiceovers entirely, Text-to-Speech voices are becoming a popular option for voice projects which require minimizing costs and faster time to production. The convenience and flexibility in using TTS voices offer another level of service to your business", says Terry H. Hill, Managing Partner of The Seaplace Group.

Start today with our free 7-day trial to gain a better understanding of how our text-to-speech technology works. Over the course of the trial, you can create a project(s) with up to 7500 words and unlimited downloads for FREE at [createAIVoiceovers.com](https://createAIVoiceovers.com). No credit card information is required for the free trial.
