

New MOONGRASS NFT Collection Creates Interesting Opportunities for Everyone

Bored N Baked Inc. upgrades the community aspect of non-fungible token ownership.

Edmonton, Alberta Oct 17, 2022 ([Issuewire.com](https://www.issuewire.com)) - The first known NFT is called “Quantum.” It was minted by Kevin McCoy and Anil Dash in 2014, and it is a simple video clip of McCoy’s wife. Since then, artists have taken advantage of this medium to create an entirely new world of collecting and investing. Bored ‘N Baked Inc. offers an innovative new take within this evolving industry by introducing the MOONGRASS NFT collection on the Ethereum (ETH) blockchain.

MOONGRASS offers 4,321 unique, hand-drawn profile picture (PFP) NFTs for collectors at a discounted pre-sale mint price of 0.12 ETH.

Once the pre-sale is over, the price for each NFT rises to 0.2 ETH. The MOONGRASS collection will be available on OpenSea.

Entrepreneur Keith Maki is the founder of the MOONGRASS project and works as a developer and an artist alongside his team. He says the benefits of investing in this NFT concept go beyond having an awesome profile picture to share with the world.

“Your PFP NFT doubles as your membership to our Bored N Baked Club, where each member receives exclusive access to giveaways and more,” Maki said. “Our plan is to provide merchandise drops, popup events, whitelist for future releases, IP rights, and many other benefits for those who decide to become holders of our collections.

Although many NFT communities offer similar benefits, Maki notes that the MOONGRASS project has preselected milestones for collectors to consider. “After the first 864 NFTs are minted from the MOONGRASS collection, we’ll hold a random draw to give away 5 ETH,” he said. “We’ll also hold another draw for every 864 minted after that first milestone.”

The MOONGRASS community will host various contests throughout the year where NFT holders can win ETH through participation. “All winners are selected at random from our smart contract,” Maki added.

Anyone interested in minting an NFT from the MOONGRASS collection must have the Metamask wallet found at metamask.io. After installing and funding it, click on the “Connect Wallet” button on the website, select the number you’d like to mint and proceed with the mint. Mobile users must use the Metamask browser in the app to participate.

“We see MOONGRASS as an opportunity for collectors to enhance their blockchain knowledge while diversifying their portfolios,” Maki said. “By allocating small sums to tokenized assets, ownership is easily transferred, if desired. Our community-based approach adds even more value while keeping the invitation to participate as open as possible.”

More information about the MOONGRASS collection from Bored N Baked Inc. is available at <https://www.moongrass.io/>.

About the Company:

Bored N Baked Inc. embraces the next evolution of cannabis and NFT culture while ensuring that anyone from any location or profession can join. By creating a safe space where collectors can tell their stories and join like-minded investors, the community can continue to gather while exploring new and rewarding opportunities for all.
